**Section II: Object****II.1) Scope of the procurement****II.1.1) Title**

MR-guided Laser Interstitial Thermal Therapy (MRgLITT) for treatment of epileptogenic zones for Adults with refractory focal epilepsy

**II.1.2) Main CPV code**

- 85100000 - Health services

**II.1.3) Type of contract**

Services

**II.1.4) Short description**

NHS Arden and Greater East Midlands Commissioning Support Unit (AGCSU), on behalf of NHS England Specialised Commissioning (referred to as the Commissioner), invited suitably qualified and experienced providers to bid for an opportunity to provide MR-guided Laser Interstitial Thermal Therapy (MRgLITT) for treatment of epileptogenic zones for adults with refractory focal epilepsy (Lot 1: North & Lot 2: South). As a result of this procurement exercise the Commissioner has awarded contracts for these services.

### **II.1.6) Information about lots**

This contract is divided into lots: Yes

### **II.1.7) Total value of the procurement (excluding VAT)**

Value excluding VAT: £2,153,100

## **II.2) Description**

### **II.2.1) Title**

A. Lot 1- North

Lot No

1

### **II.2.2) Additional CPV code(s)**

- 85100000 - Health services

### **II.2.3) Place of performance**

NUTS codes

- UKD - North West (England)

### **II.2.4) Description of the procurement**

MRgLITT, also known as 'laser interstitial thermal therapy' (LITT), is a minimally invasive treatment which can be used in focal refractory epilepsy. Stereotactic neurosurgical technique is used to guide a 3mm diameter fibreoptic laser to the target area of the brain. Under continuous MRI monitoring, laser energy is applied to the target area to destroy the part of the brain causing seizure activity. It is safer than open neurosurgery as there is less risk of collateral damage to other structures in the brain. Open surgery causes damage along the operative pathway to access the part to be removed, which is mitigated by this minimally invasive approach.

The service will commence on 1st September 2024 and will run for a duration of 5 years (initial period). The Commissioner has the option to extend for up to a further 2 years making a possible maximum contract duration of 7 years.

### **II.2.5) Award criteria**

Quality criterion - Name: Quality (Service Delivery / Technical) / Weighting: 90%

Quality criterion - Name: Social Value / Weighting: 10%

Cost criterion - Name: N/A / Weighting: 0%

#### **II.2.11) Information about options**

Options: No

#### **II.2.13) Information about European Union Funds**

The procurement is related to a project and/or programme financed by European Union funds: No

### **II.2) Description**

#### **II.2.1) Title**

B. Lot 2 - South

Lot No

2

#### **II.2.2) Additional CPV code(s)**

- 85100000 - Health services

#### **II.2.3) Place of performance**

NUTS codes

- UKI - London

#### **II.2.4) Description of the procurement**

MRgLITT, also known as 'laser interstitial thermal therapy' (LITT), is a minimally invasive treatment which can be used in focal refractory epilepsy. Stereotactic neurosurgical technique is used to guide a 3mm diameter fibreoptic laser to the target area of the brain. Under continuous MRI monitoring, laser energy is applied to the target area to destroy the part of the brain causing seizure activity. It is safer than open neurosurgery as there is less risk of collateral damage to other structures in the brain. Open surgery causes damage along the operative pathway to access the part to be removed, which is mitigated by this minimally invasive approach.

The service commenced on 23rd July 2024 and will run for a duration of 5 years (initial period). The Commissioner has the option to extend for up to a further 2 years making a possible maximum contract duration of 7 years.

#### **II.2.5) Award criteria**

Quality criterion - Name: Quality (Service Delivery / Technical) / Weighting: 90%
