II.2.3) Place of performance

NUTS codes

- UKL18 - Swansea

Main site or place of performance

Swansea Bay University Health Board Hospital sites and Princess of Wales Hospital, Bridgend.

II.2.4) Description of the procurement

Blood glucose monitoring refers to testing the concentration of glucose in the blood to aid the management of Diabetes types 1 & 2. Similarly, monitoring the presence of ketones in the blood is also important as high levels can result in complications such as Ketoacidosis.

This procurement will involve the supply of Blood glucose monitoring equipment(meters) and associated consumables (Test-strips for the Point of Care Testing Service at Swansea Bay University Health Board & Princess of Wales Hospital, Bridgend. This will be to renew the existing arrangement with Abbott Laboratories Ltd.

II.2.11) Information about options

Options: No

II.2.13) Information about European Union Funds

The procurement is related to a project and/or programme financed by European Union funds: No

Section IV. Procedure

IV.1) Description

IV.1.1) Type of procedure

Award of a contract without prior publication of a call for competition in the cases listed below

- The procurement falls outside the scope of application of the regulations

Explanation:

The current contract with Abbott Laboratories Ltd ended on the 30th September 2021. The Health Board's intention was to enter into a 2 year contract with Abbott Laboratories Ltd through a direct award under the terms of a Public Sector Framework. This would enable sufficient time for NWSSP Shared Services Procurement to undertake a formal market-test exercise, to award a new All Wales Framework in Autumn 2023. Currently, the Health Board's POCT Service are not able to contemplate an alternative supplier for the reasons outlined below:

Within SBU there are 3,279 active operators and the SBU POCT Team also support another 937 on the Princess of Wales (PoW) site under the terms of an SLA

The migration of operators to a completely new device would need to be completed on a rolling basis with full training for every member of staff. The POCT Team is not in a position to support this due to the extra training demands in relation to Covid-19 and the clinical areas are still finding it difficult to release staff to attend training, due to staffing pressures.

The current management of testing allows for staff to move flexibly from one area or site to another. During the process of migration this flexibility will be lost to a degree with some areas using the new meter and other areas using the existing meter, this could expose the HB to risk, given current staffing pressures.

Unfortunately, the Health Board cannot find a Public Sector Framework with which to engage with Abbott Laboratories Ltd at this time and therefore, there is no opportunity to make a compliant direct award.

For the reasons outlined above and to ensure continuity of service for patient care, the Health Board has no option but to extend for two years without any formal underpinning Framework arrangement.

In the interim the Health Board is committed to the All Wales market test which will come

to fruition in Autumn 2023, for a new formal contract for Point of Care Blood Glucose & Ketone Testing.

IV.1.8) Information about the Government Procurement Agreement (GPA)

The procurement is covered by the Government Procurement Agreement: No

Section V. Award of contract/concession

A contract/lot is awarded: Yes

V.2) Award of contract/concession
