Description

The UKNNL is looking to establish an open framework for software solutions and hardware in support of technical and scientific computing applications.

The envisaged scope of this framework will include:

- Development of technical and or scientific software applications covering any aspect of nuclear science and technology
- Infrastructure as code for the deployment of cloud-based applications for technical and scientific applications
- Edge computing devices and technologies, not excluding compute infrastructure, wireless and other network technologies, IoT devices to couple with sensor technologies

- Access to national level computing facilities for the development of scientific and technical solutions for the delivery of NNL's core business activities
- Software solutions for embedded devices and programmable logic controller systems for edge deployments
- Research collaborations in the field of scientific and technical computing aligned with NNL's core business activities

This framework is envisaged to be categorised into the below Lots:

Lot 1 - Infrastructure Support

Lot 2 - Software Development

Lot 3 - Edge Computing & IoT

Lot 4 - Scientific Computation Facilities

Lot 5 - Research activities

Lot 6 - Full solution build

Commercial tool

Establishes a framework

Total value (estimated)

- £5,000,000 excluding VAT
- £6,000,000 including VAT

Contract dates (estimated)

- 1 October 2025 to 30 September 2029
- Possible extension to 30 September 2033

- 8 years

Main category

Services

CPV classifications

- 72000000 - IT services: consulting, software development, Internet and support

Contract locations

- UKD - North West (England)

Participation

Particular suitability

Small and medium-sized enterprises (SME)

Submission

Publication date of tender notice (estimated)

1 August 2025

Procedure

Procedure type

Open procedure

Above or below total value threshold

Above or equal to threshold
