## **Section II: Object**

### **II.1) Scope of the procurement**

#### **II.1.1) Title**

Radiation Monitoring Network

#### **II.1.2) Main CPV code**

- 50000000 - Repair and maintenance services

#### **II.1.3) Type of contract**

Services

#### **II.1.4) Short description**

RIMNET (Radioactive Incident Monitoring Network) is a radiation monitoring and emergency response system which was installed in 1988 to monitor the consequences for the UK of radiological incidents abroad following lessons learned from the Chernobyl accident in 1986. The system is now utilised in the UK response to all major radiological events. The network consists of over 200 gamma dose rate monitors around the UK. The contract will be for the operation, maintenance and eventual replacement of the current network, as well as the supply of new monitors to enhance the current technology.

This procurement will take the form of a Restricted Procedure under the Defence and Security Public Contracts Regulations (DSPCR) 2011. If you wish to participate and view the Invitation to Tender documents, please register on Jaggaer, agree to the terms and conditions of the Mutual Non-Disclosure Agreement and respond to the Pre-Qualification Questionnaire by 12 noon on the 24.10.2022. Bidders who pass the pre-qualification stage will be notified and sent the tender documents.

Please note the deadline for responses to the Pre-Qualification Questionnaire has been extended from 10.10.2022 to 24.10.2022.
