Section II: Object

II.1) Scope of the procurement

II.1.1) Title

Reference Data & Master Data Management

Reference number

C301256

II.1.2) Main CPV code

- 72000000 - IT services: consulting, software development, Internet and support

II.1.3) Type of contract

Services

II.1.4) Short description

A centralized Reference Data Management (RDM) and Master Data Management (MDM) solution within the UK Health Security Agency (UKHSA) to streamline data operations, ensuring consistency, eliminating data duplication, enhancing data quality, and facilitating more accurate reporting and analysis.

II.1.6) Information about lots

This contract is divided into lots: No

II.1.7) Total value of the procurement (excluding VAT)

Value excluding VAT: £885,582

II.2) Description

II.2.3) Place of performance

NUTS codes

- UK - United Kingdom

II.2.4) Description of the procurement

The purpose of the contract award is to implement a centralized Reference Data Management (RDM) and Master Data Management (MDM) solution within the UK Health Security Agency (UKHSA). Currently, reference data is managed separately by individual applications, addressing both operational needs and analytical reporting. This fragmented approach results in inefficiencies, inconsistencies, and inaccuracies in reported information. By incorporating a centralized RDM and MDM solution, the project aims to streamline data operations, ensuring consistency, eliminating data duplication, enhancing data quality, and facilitating more accurate reporting and analysis. Ultimately, this initiative is expected to reduce long-term data management expenses and improve overall data governance. This project is a fundamental component of the broader Data Ecosystem framework within the UKHSA. The framework's goal is to integrate enterprise tools that enhance data operations across the agency. The RDM and MDM solution will serve as a core capability for onboarding, managing, version-controlling, and providing key reference and master data to internal consumers on demand or periodically. The solution will support the management of crucial datasets such as Location data, Clinical codes, and Patient information. This initiative will not only improve operational efficiency by reducing errors, discrepancies, and redundancies but also ensure regulatory compliance and enhance data integration and interoperability across various systems and platforms.

II.2.5) Award criteria

Price

II.2.11) Information about options

Options: No

II.2.13) Information about European Union Funds

The procurement is related to a project and/or programme financed by European Union funds: No

Section IV. Procedure

IV.1) Description

IV.1.1) Type of procedure

Restricted procedure
