II.2.4) Description of the procurement

BCP Council came into existence on 1 April 2019 following parliamentary approval for local government reorganisation in Dorset. The Dorset Local Government Reorganisation

(LGR) process began back in 2014, with the development of the Local Partnerships report into the financial feasibility of moving from nine local authorities to two. The Case for Change (2016) developed this view from merely transition to also consider the potential financial benefits that could arise from transformation of the two new authorities, while also developing a place-based focus on the benefits expected from the reorganisation. This led to a decision to establish Bournemouth, Christchurch and Poole Council (BCP Council) alongside Dorset Council as two new unitary councils.

BCP Council is currently undertaking an organisational design project and is implementing a new operating model. At the centre of the operating model is the use of strategic technology and data to deliver digitally enabled services, including a single digital front door to access council services. The new operating model will be implemented over the next five years.

As the Council is a newly formed unitary authority there will be changes during the life of the contract while there is migration of the three legacy councils' internal accounting systems and processes. The Council requires a supplier that can deliver Banking Services flexibly during the term of the delivery in order to support in the transformation being undertaken at the Council.

The Council currently has a variety of bank accounts to deliver its services, which stems from the three legacy councils. As the Council goes through this transformation process, its requirements will change and the supplier must be flexible and innovative to help the Council to continue to deliver its services.
