II.1.3) Type of contract

Supplies

II.1.4) Short description

Our site safety and security is vital and enables us to deliver life's essential service to our customers, and maintaining our estate successfully is crucial to keeping our frontline operation working.

We believe there is an opportunity to improve the efficiency of our supply network and maximise the benefit to our operations, by exploring new innovations and ways of working across our site infrastructure.

We are keen to work with suppliers who can meet our different Electric Security System (ESS) needs (which includes provision, installation and maintenance of CCTV, Access Control, IDS, PIDS), to ensure we implement the most efficient and beneficial solution.

Thames Water intends to award a number of Framework Agreements for ESS Products, installation and maintenance, covering both standalone systems and those that communicate with our centralised alarm monitoring centre to optimise security and value for money.

The agreements will be awarded under the following lot structure:

Lot 1 - Supply and install of new Enterprise ESS products

Lot 2 - Maintain existing Enterprise ESS products on the TW estate

Lot 3 - Supply, install and maintain new and existing Standalone ESS products on the TW estate

Please note that, due to the sensitive nature of the PQQ and ITN content, a Non Disclosure Agreement will need to be signed before access can be granted to our eProcurement system.
