I.4) Type of the contracting authority

Body governed by public law

I.5) Main activity

Health

Section II: Object

II.1) Scope of the procurement

II.1.1) Title

BWC WMCPD Digital Referral Solution - Market Engagement

Reference number

PROC.08.0715

II.1.2) Main CPV code

- 48000000 - Software package and information systems

II.1.3) Type of contract

Supplies

II.1.4) Short description

The West Midlands CAMHS Provider Collaborative (WMCPD) has scoped options to enhance its referral process through digital innovation. This appraisal assesses three alternatives to replace the current manual, email-based system, which is inefficient and plagued by a high rate of returned referrals due to missing or incorrect information. The current referral method, which involves filling out and emailing a Word document (Form 1), is labour intensive and error prone. This approach has led to a substantial administrative burden, consuming upwards of 105 hours each month to ensure the sufficiency of information for clinical gatekeeping.

The referral hub faces significant challenges, with 68% of referrals requiring resubmission due to incomplete or erroneous information. The iterative nature of the existing process introduces delays and inefficiencies, affecting the prompt placement of patients and taxing resources. With the impending expansion of services to include an additional seven Integrated Care Boards from September 2023, the need for a robust digital solution is pressing.

II.1.6) Information about lots

This contract is divided into lots: No

II.2) Description

II.2.3) Place of performance

NUTS codes

- UKG - West Midlands (England)

II.2.4) Description of the procurement

We would like to Develop our own digital platform that we can develop to our own requirements and digitise our current Form 1 and allow us an opportunity to use the platform for other internal referral type tasks. The platform will make it easier for people to send in a referral and remove any issues of key information missing by having mandatory fields where appropriate. The referral hub team will be able to log into the platform and review referrals which will keep all forms in one place making it easier to administer and process. The platform will also be built in a modular fashion, meaning we can develop future enhancements such as connecting to other EPR systems and build AI algorithms. This option ensures that we are creating exactly what we need, in the way we need it. We propose the creation of a bespoke e-referral system tailored to the nuanced requirements of the West Midlands CAMHS Provider Collaborative (WMCP), focusing on scalability, interoperability, and national potential for commercial deployment. This strategic solution is designed to meet the WMCP's immediate operational needs while embodying the NHS's commitment to healthcare modernisation via digital transformation. By leveraging cutting-edge technology, the system will provide a robust, flexible platform that streamlines service delivery and optimises data utilisation, thereby elevating patient care and enhancing overall operational efficacy.

II.3) Estimated date of publication of contract notice

31 March 2025

Section IV. Procedure

IV.1) Description

IV.1.8) Information about the Government Procurement Agreement (GPA)

The procurement is covered by the Government Procurement Agreement: No

Section VI. Complementary information

VI.3) Additional information

Suppliers wishing to participate in this market engagement exercise and express an interest in this requirement should respond to the questionnaire via the online form on the Health Family Single eCommercial System Portal (Atamis) by 15:00 on Monday 23rd September 2024.
