Section II: Object

II.1) Scope of the procurement

II.1.1) Title

Telemetry System Upgrade & Situational Awareness Capability for Yorkshire Water Services Limited

II.1.2) Main CPV code

- 71700000 - Monitoring and control services

II.1.3) Type of contract

Services

II.1.4) Short description

Objective:

This notice serves to inform the market of an upcoming procurement opportunity aimed at transforming and enhancing Yorkshire Water Services Limited's Operational Technology (OT) platforms and processes. The key focus of this procurement is to replace the existing Legacy Telemetry System and develop a unified Situational Awareness ecosystem.

The current telemetry system gathers data from thousands of remote assets in near real-time, converting this data into actionable business intelligence. This functionality ensures the safe and efficient operation of various assets, including monitoring reservoir and borehole levels, water quality readings, and pump or valve statuses across both clean and wastewater systems. The processed data is displayed in our operational control room and accessed remotely by key operational users, ensuring that our assets and processes operate efficiently, minimising risks to customers and the environment.
