Section II: Object

II.1) Scope of the procurement

II.1.1) Title

IoT EM27/SUN Series Spectrometers

Reference number

NCA31049

II.1.2) Main CPV code

- 38433000 - Spectrometers

II.1.3) Type of contract

Supplies

II.1.4) Short description

The EM27/SUN Series represents mobile analysers dedicated to atmospheric studies with outstanding performance. It is used by universities and research institutions, for example in urban sites to determine the impact of human activities, e.g., on greenhouse gas concentrations, but also in remote sites to investigate natural gas sources such as bush fires or gases emitted from melting permafrost or swamps. By positioning several EM27/SUN around such potential sources of greenhouse gases, their source strength can be detected and even be quantified.

II.1.6) Information about lots

This contract is divided into lots: No

II.1.7) Total value of the procurement (excluding VAT)

Value excluding VAT: £517,965.44

Section IV. Procedure

IV.1) Description

IV.1.1) Type of procedure

Award of a contract without prior publication of a call for competition in the cases listed below

- The services can be provided only by a particular economic operator for the following reason:
 - absence of competition for technical reasons

Explanation:

The five Bruker EM27/SUN units are being purchased for use in the GEMINI+Edinburgh project, using the same scientific approach, applied at the city level (City of Edinburgh), for determining Green House Gas Emissions, as has been utilised in the GEMINI UK-wide project from which this project stems. It is therefore critical that the same underlying highly specialised scientific instrument is used. There is therefore no applicable alternative, and Bruker are the sole supplier of this scientific instrument.
