Additional information added to the description.

Scope

Description

Westmorland and Furness Council is responsible for the strategic local services within the Council boundaries. The highways team within the Council is responsible for a highway's asset comprising over 4,343km of road:

- 507 km of A Class Roads (Primary Route Network);
- 1,606 km of B and C Class Roads (Non- Primary Route Network);
- 2,230 km of Unclassified roads
- 2,469 km of footways etc.
- The Council also maintains the following list of structures:
 - 1075 council owned highway bridges
 - 56 council owned highway footbridges
 - 521 council owned and unknown ownership highway retaining walls.
 - 384 council owned highway culverts
 - 178 council owned highway culverts

In house operational teams carry out a variety of maintenance works across the county. Maintaining the safety of the public and the Council's staff is a key consideration in delivering these works. Often these works require only very basic temporary traffic management measures which are carried out by the in-house teams. However more substantial works or works on busier streets require temporary traffic management works that are beyond their expertise and qualifications and require equipment not held by the in-house teams. For these schemes external specialist contractors are required to carry out the required temporary traffic management.

This tender will be advertised via The Chest. If you are not already registered on the portal the help you need to get started can be found here <https://www.the-chest.org.uk/>. Further details will be available in the tender documents once published.

Commercial tool

Establishes an open framework

A series of frameworks with substantially the same terms. Awarded suppliers are carried over and new suppliers can bid.

Total value (estimated)

- £3,000,000 excluding VAT
- £3,600,000 including VAT

Above the relevant threshold
