II.1.1) Title

Dental School Patient Administration System (PAS)

Reference number

itt_809. IT-2105-099-PC_1958

II.1.2) Main CPV code

- 48814200 - Patient-administration system

II.1.3) Type of contract

Supplies

II.1.4) Short description

The University's new Dental School is aiming to open by September 2022. The Bristol Dental School is currently integrated and collocated with the Bristol Dental Hospital, which is run by the Universities Hospitals Bristol & Weston NHS Foundation Trust. As such, the IT systems currently used by the Dental School to facilitate clinical practice are those used by, and provided by, the NHS Trust.

The intention of the New Dental School project is to separate the University's Dental School both physically and operationally from the Dental Hospital and the NHS Trust, creating a separate and independent Dental School and clinical facility based at a new dedicated location within Bristol.

In conjunction with this move, the Dental School's operating model will be redefined to deliver enhancements to the quality of clinical education along with significant improvements to student, staff and patient experience.

By separating from the NHS Trust, and the Dental Hospital, the New Dental School will need to procure a number of new IT systems to support the clinical practice elements of the school.

This procurement is specifically for the provision of Patient Administration System (PAS) software.

The new system must ensure that the Dental School can manage all interactions with

patients digitally, on the system, including a full record of all interaction / engagement with the patient, treatment plan, booking of appointments and clinics and digital access to scans, images, patient letters and other documents associated with the patient or their treatment.

It is expected that the system will manage:

- Patient records and associated data (charts, treatment plans, scans & image files, patient letters etc.)
- A process for clinical supervisors to review and approve student updates to patient records (e.g. patient notes, treatment plans)
- A mechanism for managing patient referrals to and from other care providers (including sharing of relevant patient details, notes and scans, X-rays and image files)
- Functionality to support onboarding of new patients (referrals and self-referral requests, triage of referral requests)
- Appointment management, including the scheduling and resourcing of clinics
- Patient communications (e.g. paper, email and ideally SMS)

The solution should also provide data analytics and insights that can be used to help maintain and improve clinical practice and patient experience.

Note: vendors also refer to this type of system as a 'Practice Management' system.

II.1.6) Information about lots

This contract is divided into lots: No

II.2) Description

II.2.3) Place of performance

NUTS codes

- UK - United Kingdom

II.2.4) Description of the procurement

This procurement is specifically for the provision of Patient Administration System (PAS) software.

The requirements are published in full at University of Bristol's tendering portal. Please register and review Opportunities for access.

II.2.5) Award criteria

Price is not the only award criterion and all criteria are stated only in the procurement documents

II.2.7) Duration of the contract, framework agreement or dynamic purchasing system

Duration in months

72

This contract is subject to renewal

No

II.2.10) Information about variants

Variants will be accepted: No

II.2.11) Information about options

Options: Yes

Description of options

The contract duration is 4 years plus 2 x one year option periods.

II.2.13) Information about European Union Funds

The procurement is related to a project and/or programme financed by European Union funds: No
