Description

Birmingham City Council (the Council) is seeking for organisations to submit a quotation for: "P2315 Examination and of Testing of Electronic Cigarettes Seized by BCC Trading Standards Officers".

Introduction

The Council requires a supplier for the provision of a service for examination of electronic cigarettes ("Vapes") seized by Birmingham City Council's Trading Standards Officers to check the electronic cigarette are compliant with the law.

Trading standards is a statutory function within the local authority, and they enforce over 300 pieces of consumer protection legislation. The local weights and measures authority in Birmingham City Council (trading standards) has a statutory duty to enforce the provisions of The Tobacco and Related Product Regulations 2016. Under the provisions of this legislation it is a criminal offence for traders to supply a vape which does not comply with product requirements under regulation 36 (2) (b) of the Tobacco and Related Products Regulations 2016. These requirements are that the nicotine-containing liquid in the single use cartridge, or tank volume must not exceed 2 millilitres, and the capacity of the tank must not exceed 2 millilitres. If the electronic cigarette tested fail one of these tests, then the retail or wholesale supplier selling the electronic cigarette is in contravention of Regulation 48(d) of The Tobacco and Related Products Regulations 2016.

As such Trading Standards service have a duty to enforce this legislation by way of carrying out inspections at retail and wholesale premises. Where non-compliant items are found they are seized and sent off for testing to an accredited laboratory which is able to test for nicotine quantity and tank capacity. The supplier providing the accredited laboratory also has also to provide an expert report and witness statement that can be used in a criminal court case. On average, from a retail trade inspection, officers can seize an average of 400 electronic cigarette per premise. A sample of the seized electronic cigarette are sent off for examination. The aim of this procurement exercise is to contract a supplier with an accredited laboratory to carry out the testing of electronic cigarette seized by BCC trading standards officers.

Requirements/Specification

The supplier must be part of an accredited test house (e.g., UKAS) and carry out testing to ISO/IEC standards with suitably qualified staff and systems in order to test electronic cigarette to find out whether:

1. The tank capacity size containing the liquid is greater than 2 million millilitres (tank capacity of 2 million ml or less is required by section 36(2)(b) of The Tobacco and Related Products 2016 Regulations).
2. The Nicotine concentration is greater than 20.00mg/mL (nicotine concentration of 20.00mg/mL or less is required by section 36 (4) of the Tobacco and Related Products 2016 Regulations).

The supplier must be able to produce a comprehensive analytical report about the findings derived from testing the electronic cigarette (with full evidential traceability of samples) and supply this report to BCC Trading Standards. The report needs to confirm if the electronic cigarette tested is complaint or non-complaint with the Tobacco and Related Products 2016 regulations.

This report will be appended by Trading Standards Service along with a separate witness

statement that is provided by the test house exhibiting the full test report and analysis of the non-compliant electronic cigarette. This is required by the investigating officer as part of the evidence supplied to court. By providing this report, the test house confirms the electronic cigarette have been analysed and they are prepared to attend court to give evidence to support the report's findings (if necessary).

The supplier should be able to test the electronic cigarette and produce the resulting report within 14 days of receiving samples from the Council.

The average, sample size the Council will send to the supplier for testing will consist of 10-15 electronic cigarette. Trading Standards normally carries out around 4 inspections a month. The supplier should be able to cope with testing this volume of products.

The Council will be using its free to use e-tendering system (in-tend) for the administration of this procurement process and potential suppliers must register with the system to be able to express an interest. If you wish to express an interest in this opportunity please click on the following link to access <https://in-tendhost.co.uk/birminghamcc/> and submit your details to register.
