Section IV. Procedure

IV.1) Description

IV.1.1) Type of procedure

Award of a contract without prior publication of a call for competition in the cases listed below

- The works, supplies or services can be provided only by a particular economic operator for the following reason:
 - absence of competition for technical reasons

Explanation:

For technical reasons, i.e. software or systems already integrated in the business and changing supplier would incur significant costs and risk - changing the ITSM tool will not only be more expensive (similar tools are typically more than 3 times the price), it will also have the following knock on affects:

- Loss of the historic records of existing assets - who did what and to which asset. This is essential for regulatory purposes especially in terms of the OT assets, and is also essential to maintain the visibility of devices and software licenses for audit purposes.
- Loss of the historic changes to our SAP roles and authorisations which we require for our Governance, Risk Management and Compliance audits.
- Loss of the historic Incident and Change information that we use to enable fault finding across our systems.
