Section II: Object

II.1) Scope of the procurement

II.1.1) Title

Cambridgeshire Energy Performance Contracting Project - RE:FIT3 Competition - Further Competition under RE:FIT3 Framework RM3768 (20th April 2016)

Reference number

DN265022

II.1.2) Main CPV code

- 45000000 - Construction work

II.1.3) Type of contract

Works

II.1.4) Short description

Service Provider to work with the Authority closely in order to optimise the energy efficiency of selected premises, assets and sites, improve the energy performance of its assets through measured and verified energy efficiency improvements and/or energy generation, storage, electric vehicle charging or other mechanisms to reduce emissions and save money through guaranteed annual cost savings and/or income generation.

The aim is to bring forward a rolling programme of public sector energy projects entering into Contracts until the expiration of the Framework Agreement on 19 April 2020. The target investment level is £50 million but is not limited to this level as a significant one-off project could exceed this limit. To achieve the investment target, the appointed Service Provider must invest in the resources to assess a large range of projects to support the upfront pipeline development, in partnership with the Contracting Authority and public sector partners.

Text

This procurement is for the provision of a service provider to work with the Authority closely

in order to optimise the energy efficiency of selected premises, assets and sites, improve the energy performance of its assets through measured and verified energy efficiency improvements and/or energy generation, storage, electric vehicle charging or other mechanisms to reduce emissions and save money through guaranteed annual cost savings and/or income generation.

The aim is to bring forward a rolling programme of public sector energy projects entering into Contracts until the expiration of the Framework Agreement on 19 April 2020. The target investment level is £50 million but is not limited to this level as a significant one-off project could exceed this limit. To achieve the investment target, the appointed Service Provider must invest in the resources to assess a large range of projects to support the upfront pipeline development, in partnership with the Contracting Authority and public sector partners.

VII.2) Other additional information

Duration of the call off contract is 148 months covering a period between 01st November 2017 to 27th February 2030. This period is the start of the call off contract, and the ending of the initial 5 year O&M element of the last investment grade project the Authority will complete under this call off Contract and Framework.

the original duration was 48 months - the length of the Call off contract itself, not including the investment grade project contracts.
