II.2.4) Description of the procurement

SWIMMR will develop and deploy new instruments, models and services to support the UK space weather community and the Met Office Space Weather Operations Centre. This programme will significantly add to the UK's capability to predict and mitigate the hazards of space weather, as well as providing a basis for wider international collaboration over the lifetime of the proposal and beyond.

The funding forms part of the Strategic Priorities Fund (SPF), delivered by the UK Research & Innovation (UKRI) to drive an increase in high quality multi- and interdisciplinary research and innovation. It will ensure that UKRI's investment links up effectively with government research priorities and opportunities. The programme is a collaboration led by the Science and Technology Facilities Council (STFC) with NERC and supported by the Department for Business, Energy and Industrial Strategy (BEIS), the Department for Transport and the Ministry of Defence. The programme has been outlined in close association with the Met Office Space Weather Operations Centre (MOSWOC).

The programme will be delivered through a series of activities managed by either STFC or NERC.

The "Trusted Space Sensor" tender is the procurement of an instrument with a spacecraft

host to gather radiation data from space over at least one year in space and is part of the “S1: Improved in-situ radiation measurements for space and aviation” project.
