Description

The current Engineering Services Framework consists of eleven lots and is due to expire in June 2026, we are therefore preparing to introduce a new framework to cover the current services with the potential to introduce new lots where required.

The new framework will seek to appoint suppliers for the provision of services on an as and when required basis, predominantly in relation to the effects of past mining liabilities and other areas of responsibility of the Mining Remediation Authority.

Services required will include, but not be limited to

- Investigation into the causes of failure, condition assessment, damage quantification and solution design for damage to roads, bridges, buildings, drainage land etc. caused by past

mining.

- The areas of expertise may include civil, structural, geotechnical, mining, mechanical and electrical engineering, also environmental, health and safety, contract procurement, agricultural and specialist land drainage advice relating to past coal mining subsidence liabilities and other specialist service areas such as hydrology and hydrogeology.
