Description

Anglian Water Services (AWS) WRMP24 has identified significant challenges for the East of England, primarily due to a forecasted reduction in available supply of potable water and an increase in the demand forecast. Without intervention, a daily shortfall of 593 megalitres (MI) of water is estimated by 2050, which equates to approximately half of the current volume of water entering the network.

As a result, two desalination plants have been identified as part of the Adaptive Plan to address the shortfall in Norfolk and Lincolnshire. Both desalination plants will abstract and desalinate seawater from the North Sea. Initial design assumptions are that the desalination plant will include pre-treatment, reverse osmosis, and remineralisation, before the treated water is blended and pumped into supply and the brine waste is discharged via a long outfall to sea.

Desalination is a new technology for Anglian Water, therefore we do not have sufficient

experience within the business and expertise is limited within our usual supply chain.

This is a tender to procure up to two Desalination Technical Partners to support us in the development stages for both sites. The Primary Partner will be awarded the minimum scope of work (as defined in the Scope document) for both sites and any additional work over and above this is to be awarded at Anglian Waters discretion. As a result even though the tender notice value is £29m (ex VAT), the bidder is only guaranteed the minimum scope spend, estimated to be £4.7m.

We also note that the geopolitical landscape, along with regulations from the Environment Agency and other governing bodies, may evolve during the contract period, which may impact spend and / or the scope. This is an known unknown risk to this procurement exercise.

Establishes a framework

Total value (estimated)

- £29,000,000 excluding VAT
- £34,800,000 including VAT

Above the relevant threshold

Contract dates (estimated)

- 1 November 2025 to 31 October 2030
- Possible extension to 31 October 2035
- 10 years

Description of possible extension:

The contract term will be up to 10 years, depending on the future need.

The initial term will be 5 years with the option, at Anglian Waters discretion, to extend up to another 5 years, totalling a 10 year framework.

Competitive flexible procedure description

The purpose of this tender is to appoint two partners (one primary and one secondary) with experience of the development and delivery of major desalination projects. We are looking for a Partner who can provide the necessary technical expertise for the development phase of our desalination programme.

The primary partner will lead on the design and engineering services of both projects (Norfolk and Lincolnshire) up until handover with the Competitively Appointed Provider (CAP).

The secondary partner may be called upon to provide a secondary view on critical and important design outputs, as well as being available to provide resilience.

A market engagement exercise was conducted (Dec 24 - Jan 25), however it was under the Utilities Contracts Regulations 2016 meaning we cannot link the previous notice within this UK4. As a result, we have included all market engagement information and updates as support documents to the RFI event.

Documents

Associated tender documents

Documents to be provided after the tender notice

All relevant and required documents will be attached to the RFI and RFP event on Scanmarket. Scanmarket is the e-sourcing system being used to run the tender events.

The tender will be opened with a draft version of the contract terms. A draft copy will be uploaded to the RFP event on Scanmarket and a final version will replace these at some point during the RFI process.

When the updated and final terms are uploaded, all bidders who have logged into the RFI

event will be notified.

The events can be found on Anglian Waters public Scanmarket page ;
