Description

JNCC co-leads the Biodiversity loss theme of the Ocean Country Partnership Programme (OCP), a UK government-led programme under the Blue Planet Fund. For the past two years, OCP has been supporting the Senegal Government with priority areas, including data management within the Directorate of Community-based Marine Protected Areas (DAMCP).

The Ocean Country Partnership Programme (OCP) supports countries to:

- strengthen marine science expertise

- develop science-based policy and management tools
- create educational resources for coastal communities

This project aims to assist the DAMCP by developing a data management system for use across divisions within the department. The development aims to facilitate data storage, access and use across DAMCP, support data sharing with other government departments, and promote sustainable data management to enable effective retention and continued use of datasets. There may also be scope to include other functionalities to treat data to identify trends, and visualise data (such as data modelling, overlapping of maps, etc.)

Different data types are collected and collated by the DAMCP - physical & chemical data, biological data (species abundance/presence, species richness, etc.), habitat data, and human use data. The data may be collected by a field scientist but used or shared with other staff member to build trends, monitor effectiveness of MPA and guide decision. At present, there is a lack of consistency in data gathering and sharing within the DAMCP and the risk of lost data is a key priority the DAMCP are hoping to rectify. The aim of the data management system is to bring together collated datasets and to facilitate data sharing within the DAMCP.

In developing an effective data management solution to facilitate easy access to data required across the department, this project will support DAMCP staff in making evidence-based decisions to ensure effective protection of Senegal's environment.

The objectives of the project are:

- To create a simple, user-friendly data management and visualisation system that integrates different data types from across the division and meets the requirements summarised in the attached user research report and Section 4.
- To utilise existing and open-source software where possible.
- To work with the DAMCP's IT specialist to identify a sustainable server-based hosting solution.
- To ensure the system links with existing data systems in place where possible, promoting data sharing across government departments.
- Provide training and guidance documentation to support DAMCP staff in using the system.

Total value (estimated)

- £100,000 excluding VAT
- £100,000 including VAT

Above the relevant threshold

Contract dates (estimated)

- 17 June 2025 to 15 December 2025
- 5 months, 29 days

Main procurement category

Services

CPV classifications

- 48613000 - Electronic data management (EDM)
- 48614000 - Data-acquisition system
- 48620000 - Operating systems
- 48700000 - Software package utilities
- 48800000 - Information systems and servers
- 72300000 - Data services

Contract locations

- UKC - North East (England)
- UKD - North West (England)

- UKE - Yorkshire and the Humber
- UKF - East Midlands (England)
- UKG - West Midlands (England)
- UKH - East of England
- UKI - London
- UKJ - South East (England)
- UKK - South West (England)
- SN - Senegal

Participation

Particular suitability

- Small and medium-sized enterprises (SME)
- Voluntary, community and social enterprises (VCSE)

Submission

Enquiry deadline

2 June 2025, 11:59pm

Tender submission deadline

10 June 2025, 9:00am

Submission address and any special instructions

<https://jncc.gov.uk/about-jncc/corporate-information/procurement/>

To be eligible for consideration your tender must arrive by 09:00 hours on Monday/10/June/2025. Please submit your return by email to the following address: TenderResponse@jncc.gov.uk Please direct any queries in respect of this tender to contractqueries@jncc.gov.uk

Tenders may be submitted electronically

Yes

Languages that may be used for submission

English

Award decision date (estimated)

16 June 2025

Award criteria

Name	Type	Weighting
Quality of Bid	Quality	45%
