II.1.4) Short description

NGN look to put in place a contract extension for 6 months with the incumbent supplier of these services. The original contract was put in place to replace the arrangements and rationalise the data centres and provide a simplified and transparent Cloud+ Storage and Hosting arrangements. This contract also utilises modern secure private cloud hosting, reducing the overall cost and environmental impact of NGN's IT infrastructure, supported by an SCC Service Desk. Various elements from the Contract have been decommissioned and moved over to our own

AWS infrastructure, however, there are still some legacy applications which are still to be upgraded/replaced before we can host in AWS. This include GIS, CP Uptime, Brand,

McAfee and Workbook Tracker, which are all active projects in 3iG's programme to enable the switch to AWS in the next 6-9 months.

This being the case, we therefore require a 1 year extension to cover the remaining requirements with SCC before it is fully moved over to AWS. As soon as these activities are complete, we can fully decommission our SCC estate.

Section IV. Procedure

IV.1) Description

IV.1.1) Type of procedure

Award of a contract without prior publication of a call for competition in the cases listed below

- Additional deliveries by the original supplier

Explanation:

Northern Gas Networks (NGN) intend to renew their agreement with SCC for a 6 month period. NGN cannot risk operational delivery and requires contract assurance as there are still some legacy applications which are still to be upgraded/replaced before we can host in AWS. No other suppliers are able to undertake the scope of requirements as this requirement is specifically meant for SCC to meet NGN's needs. This contract also utilises modern secure private cloud hosting, reducing the overall cost and environmental impact of NGN's IT infrastructure, supported by an SCC Service Desk.
