Contract

Replacement Fire Alarm Panels Glasgow Royal Infirmary

NHS Greater Glasgow and Clyde

F03: Contract award notice

Notice identifier: 2023/S 000-028904

Procurement identifier (OCID): ocds-h6vhtk-03f6bb

Published 2 October 2023, 9:40am

Section I: Contracting authority

I.1) Name and addresses

NHS Greater Glasgow and Clyde

Procurement Department, Glasgow Royal Infirmary, 84 Castle Street

Glasgow

G4 0SF

Email

Oliver.Bailey@ggc.scot.nhs.uk

Telephone

+44 1412015388

Country

United Kingdom

NUTS code

UKM82 - Glasgow City

Internet address(es)

Main address

<http://www.nhsggc.scot/about-us/procurement/>

Buyer's address

https://www.publiccontractsscotland.gov.uk/search/Search_AuthProfile.aspx?ID=AA10722

I.2) Information about joint procurement

The contract is awarded by a central purchasing body

I.4) Type of the contracting authority

Body governed by public law

I.5) Main activity

Health

Section II: Object

II.1) Scope of the procurement

II.1.1) Title

Replacement Fire Alarm Panels Glasgow Royal Infirmary

Reference number

GGC0882

II.1.2) Main CPV code

- 31625000 - Burglar and fire alarms

II.1.3) Type of contract

Supplies

II.1.4) Short description

These works concern the replacement of VESDA (Very early smoke detection systems) that form part of the fire alarm system at the GRI. There are 40 panels that will be replaced throughout the site where the vast majority of the fire detection system is currently maintained and serviced by ADT.

Due to the complexity and size of the project the service provider would be able to manage, mobilize and schedule these works within the required timescales.

Much of the existing fire alarm system has been installed by ADT and progressing the upgrade of the existing VESDA panels would ensure that the site wide fire system was fully standardised by ADT.

There are currently 3 static fire panels at the entrance to surgical, medical and central block within the GRI campus that are due for replacement. Within the Static system there are a number of fire detection devices, manual call points and repeater panels that are part of the Static system that have been identified for renewal also. It has been recognised that faults are being highlighted on the static front end system and the need for the renewal and transfer to a compatible digital addressable system are a matter of priority as the vast majority of the site fire alarm system installed elsewhere in the building are installed and maintained by ADT where the older static systems are being phased out to allow a fully integrated fire alarm system site wide.

ADT provide maintenance and support for fire systems within GRI site and have on-site support covering reactive and planned maintenance of the fire system within the site where the technician has extensive knowledge of the systems. Due to the size and nature of the fire alarm system ADT are thought to be the only service provider who could provide the installation.

As previously mentioned much of the existing fire alarm system has been installed by ADT and progressing the upgrade of the old static system would ensure that the site wide fire system was fully standardised by the service provider ADT.

The reason this requirement has been published as a VEAT in addition to above is that ADT are thought to be the only company that can access the current closed protocol panels and upload them to the new open protocol panels.

II.1.6) Information about lots

This contract is divided into lots: No

II.1.7) Total value of the procurement (excluding VAT)

Value excluding VAT: £486,469

II.2) Description

II.2.2) Additional CPV code(s)

- 31625000 - Burglar and fire alarms

II.2.3) Place of performance

NUTS codes

- UKM82 - Glasgow City

Main site or place of performance

Glasgow Royal Infirmary

II.2.4) Description of the procurement

These works concern the replacement of VESDA (Very early smoke detection systems) that form part of the fire alarm system at the GRI. There are 40 panels that will be replaced throughout the site where the vast majority of the fire detection system is currently maintained and serviced by ADT.

Due to the complexity and size of the project the service provider would be able to manage, mobilize and schedule these works within the required timescales.

Much of the existing fire alarm system has been installed by ADT and progressing the upgrade of the existing VESDA panels would ensure that the site wide fire system was fully standardised by ADT.

There are currently 3 static fire panels at the entrance to surgical, medical and central block within the GRI campus that are due for replacement. Within the Static system there are a number of fire detection devices, manual call points and repeater panels that are part of the Static system that have been identified for renewal also. It has been recognised that faults are being highlighted on the static front end system and the need for the renewal and transfer to a compatible digital addressable system are a matter of priority as the vast majority of the site fire alarm system installed elsewhere in the building are installed and maintained by ADT where the older static systems are being phased out to allow a fully integrated fire alarm system site wide.

ADT provide maintenance and support for fire systems within GRI site and have on-site support covering reactive and planned maintenance of the fire system within the site where the technician has extensive knowledge of the systems. Due to the size and nature

of the fire alarm system ADT are thought to be the only service provider who could provide the installation.

As previously mentioned much of the existing fire alarm system has been installed by ADT and progressing the upgrade of the old static system would ensure that the site wide fire system was fully standardised and supported by the service provider ADT.

The reason this requirement has been published as a VEAT in addition to above is that ADT are thought to be the only company that can access the current closed protocol panels and upload them to the new open protocol panels.

II.2.5) Award criteria

Quality criterion - Name: Quality / Weighting: 50

Price - Weighting: 50

II.2.11) Information about options

Options: No

II.2.13) Information about European Union Funds

The procurement is related to a project and/or programme financed by European Union funds: No
