### Scope

#### **Description**

This contract aims to appoint a Supplier(s) of Digital Aerial Surveys DAS coupled with airborne LiDAR to collect data on the abundance and distribution of seabirds and marine mammals, and to provide altitude data for birds in flight. This will provide data to address evidence gaps that have been identified for specific species, areas (including within offshore wind farms), and times of year. The outputs from these surveys will be made publicly available through an Open Government License, or equivalent, and it is anticipated that they will be published on The Crown Estate's Marine Data Exchange.

### Total value (estimated)

• £0 excluding VAT

•	£0	inc	luding	<b>VAT</b>
---	----	-----	--------	------------

Above the relevant threshold

### **Options**

social value	Tackling climate change	Quality	10.00%

#### Other information

## Conflicts assessment prepared/revised

Yes

#### **Procedure**

#### **Procedure type**

Competitive flexible procedure

### Competitive flexible procedure description

This procurement relates to a two-lot project and will follow the Competitive Procedure with Negotiation (CPN), as set out in the Public Contracts Regulations 2023. The procedure enables broad market participation, including from SMEs. Following the initial evaluation of Selection Questionnaires (SQs) and proposals, up to three suppliers per lot will be shortlisted to enter the negotiation stage. This stage will allow the Authority to clarify requirements and invite revised tenders. The contract for each lot will be awarded to the supplier submitting the most advantageous tender (MAT).
