Description

Lancashire Renewables Ltd (LRL) is a company owned wholly by Lancashire Country Council and Blackpool Council. LRL operates two waste treatment facilities in Leyland and Thornton. Each site is approximately 40 acres and contains numerous buildings responsible for the receipt and processing of household and residual waste (circa 400,000 tonnes p.a.). Waste is either transported into the offtake market for further processing/ recycling or to landfill when necessary.

LRL's key objectives are to receive, treat and transport contract waste in accordance with the targets and service requirements set out in the Service Level Agreement between LRL and Lancashire County Council.

As part of its day-to-day operations, the company uses a Bollegraaf HBC80 automatic baler to compress waste material into blocks (bales) which are then secured by steel baling wire. The bales are subsequently transported on pallets by road to be further

processed, such as metals, card, paper and plastics that will be recycled.

Lancashire Renewables orders approximately 100 tonnes of baling wire per annum for the above purpose. Deliveries are made on returnable formers, with each former containing approximately 750kg of wire. The wire supplier must take away any empty formers at the point of each delivery in an exchange manner. Typical delivery volume is 24 tonnes of wire. There is currently one delivery location based at PR26 6TB.

The baling wire is subject to strict tolerances as set out in the tender specification for baling wire.

Commercial tool

Establishes an open framework

A series of frameworks with substantially the same terms. Awarded suppliers are carried over and new suppliers can bid.

Total value (estimated)

- £2,000,000 including VAT

Above the relevant threshold

Contract dates (estimated)

- 15 September 2025 to 14 September 2033
- 8 years

Options

The right to additional purchases while the contract is valid.

The anticipated value of the Goods is approximately £150,000 per annum.

Lancashire Renewables reserves the right to spend up to £2,000,000 over the entire framework term (maximum of eight years as per PA 2023 section 49; including all frameworks awarded under the open framework scheme), to account for volatility in the steel market and as-yet unknown changes to UK recycling practices that may or may not lead to increased co-mingled recycle tonnages coming into the Authority's business for processing.

The Authority currently purchases approximately 100 tonnes of baling wire per annum. However, the volumes may increase or decrease during the term of the contract.

Framework operation description

1. Price Determination

1.1 Fixed Prices

Prices submitted at Tender are fixed for 3 months from:

- o The start of the Framework.
- o The start of any subsequent framework from a reopening process.

1.2 Mini-Competition Pricing

For orders outside the fixed period or for quantities/delivery locations not covered, prices are set via:

- o Mini-Competition if two Framework Providers are appointed.
- o Most recent price review for direct awards if only one Provider is appointed.

1.3 All-Inclusive Prices

Prices must include all costs (e.g. delivery, duties, surcharges). No additional fees unless agreed during competition.

2. Award Procedure

2.1 General Approach

The Authority awards Call-off Contracts based on the terms of the Framework and as outlined in Schedule 2. This is based on either Mini-Competition or Direct Award.

2.2 Mini-Competition

Used when more than one Framework Provider is eligible.

The process shall involve:

- Submission requirements: Each Framework Provider must submit a Supplemental Tender using the Mini-Competition Form provided by the Authority.
- Evaluation: Tenders will be assessed in accordance with:
 - o The evaluation methodology, and
 - o The evaluation criteria, as specified in the Authority's Mini-Competition Form.

Mini-competitions will typically be awarded to a single Framework Provider and may be evaluated using any of the following criteria which will be clearly stated in the Mini-competition Form:

- o Price only (100%)
- o Price (100%) and Critical Delivery Date (Pass/Fail)
- o Combination of Price and Quality considerations

2.3 Direct Award

Direct Award is Permitted when:

- o A single Provider is appointed on the Framework.
- o A subsequent framework round results in only one eligible Provider.

Pricing as per the most recent approved price review if outside of a period of fixed pricing (within three months of any Framework in the series of frameworks having commenced).

Award method when using the framework

Either with or without competition

Contracting authorities that may use the framework

Establishing party only

Participation

Legal and financial capacity conditions of participation

Set out in the tender documentation (Procurement Specific Questionnaire).

Technical ability conditions of participation
