II.1.2) Main CPV code

- 79000000 - Business services: law, marketing, consulting, recruitment, printing and security

II.1.3) Type of contract

Services

II.1.4) Short description

Project background

The Energy Systems Catapult (ESC), together with partners in India, including the Indian Institute of Science (IISc), has created the Innovating for Transport and Energy Systems (ITES) initiative.

ITES is a bilateral collaboration to address key challenges around the decarbonisation of transport by carrying out joint research into specific sustainable transport issues and enabling the piloting, support and scale up of new sustainable solutions. It:

- engages with and supports Indian industry in developing solutions for hard to decarbonise parts of the transport system collaboratively or linking them to UK innovators
- considers the whole systems aspects around transport challenges, from consumer acceptance to supporting infrastructure and impact on the energy generation system
- looks to link leading Indian and UK research organisations, builds on success of the Innovating for Clean Air (IfCA) programme and provides a springboard for UK start-ups to trial their solutions in a low-risk environment

- offers UK innovators access to technical skills and expertise to support them bringing their products to the Indian market, as well as potentially Indian facilities, in the longer-term
- looks to attract public, private and third sector partners and sponsors to ensure activities are market-led and solving practical problems and to decrease the need for UK government funding in the long-term
- provides a long-term, established base for UK - India partnerships and programmes in the Net Zero space, with the potential to expand to other sectors over time
- offers a "soft-landing" for UK innovators interested in the Indian market, and vice versa, linking them to opportunities, collaborators and potential investment
- offers links to conduct knowledge exchange between UK and Indian organisations

Scope of service

ESC is seeking to appoint a supplier to provide stakeholder engagement services to the ITES with the goal of securing sponsorship for ITES. The supplier should have a track record of:

- Developing strategies for and engaging with private sector organisations in the UK
- Raising funding via direct engagement in UK
- Established relationships with investors, corporates, etc.
- Developing and delivering compelling value propositions

Full details within the Scope document.

II.1.5) Estimated total value

Value excluding VAT: £115,000

II.1.6) Information about lots

This contract is divided into lots: No

II.2) Description

II.2.3) Place of performance

NUTS codes

- UK - United Kingdom

II.2.4) Description of the procurement

Please refer to tender documents.

II.2.5) Award criteria

Price is not the only award criterion and all criteria are stated only in the procurement documents

II.2.6) Estimated value

Value excluding VAT: £115,000

II.2.7) Duration of the contract, framework agreement or dynamic purchasing system

Duration in months

6

This contract is subject to renewal

No

II.2.10) Information about variants

Variants will be accepted: No

II.2.11) Information about options

Options: No

Section III. Legal, economic, financial and technical information

III.1) Conditions for participation

III.1.2) Economic and financial standing

Selection criteria as stated in the procurement documents
