- 48100000 - Industry specific software package
- 72212440 - Financial analysis and accounting software development services

Contract locations

- UK - United Kingdom

Engagement

Engagement deadline

20 June 2025

Engagement process description

DWP have previously undertaken informal market engagement with a small select group of suppliers to explore the core Debt Management Systems capabilities in the market, this exercise helped the department consider what capabilities are standard in the market to ensure effective competition in a fair and transparent manner.

In August 2024 DWP undertook initial early market engagement and in February/March 2025 undertook a "deeper dive" into the debt management system market to assess market level capability further and to determine whether and with what level of confidence the COTS market could meet DWPs needs.

DWP used the Market Assessment to determine:

- 1) the Market's ability to meet DWPs Functional Requirements
- 2) the Market's ability to meet DWPs Non-Functional Requirements
- 3) the Market's ability to deliver key Business Scenarios representative of DWPs more complex Functional Requirements
- 4) Indicative Delivery Timescales to deliver a solution that meets DWP's needs, with an understanding of the risks, assumptions and dependencies surrounding these timescales

5) Supplier Delivery Costs which may be incurred in delivering a COTS solution and Operating Costs over the contract term

Participating suppliers were sent two Information Requests which outlined Functional and Non-Functional Requirements and gave details of seven Business Scenarios which represented DWPs more complex functional requirements. Suppliers were asked to respond to the Information Requests and demonstrate in a Workshop how they would deliver the Business Scenarios as well as responding to questions on their delivery plans and timescales.

Based on the Market Assessment DWP has concluded that the market for COTS debt management systems could meet its requirements.

1. Functional Requirements: we have a high degree of confidence that the market can meet DWPs Functional Requirements.
2. Non-Functional Requirements: we have a high degree of confidence that the market can meet DWPs Non-Functional Requirements.
3. Business Scenarios: A reasonable level of confidence that the Market could deliver DWP's complex customer journeys.
4. Delivery Timescales: A reasonable level of confidence that DWP's requirements could be met within 18 2 -24 months.

DWP specific requirements are still evolving, and we will share our high-level requirements at a further virtual Supplier briefing which will take place on Wednesday 11th June 2025. Suppliers may register their interest in attending until 16:00hrs Friday 6th June 2025.

To receive the invitation to this event suppliers will need to contact stephen.wardle@DWP.gov.uk by 6th June 2025 when an NDA will be provided to be signed to gain access to the Event.

Participation

Particular suitability

- Small and medium-sized enterprises (SME)
- Voluntary, community and social enterprises (VCSE)

Submission

Publication date of tender notice (estimated)

14 August 2025
