Scope

Description

Wavenet will be providing a fully managed internet service for the site at New Mansion Square which consists of providing connectivity to the commercial units (tech hub, cultural unit, 11 other units + 1 more in future) and the residents lounge (coworking, cinema room, phone booths)

Following the cabling recent site survey, it has been identified that additional cabling infrastructure is required to support the delivery of a managed connectivity solution.

The existing cabling infrastructure is only suitable for BT's FTTP network, which is residential

in nature and does not support the service levels or resilience expected of a business-grade

managed service.
