II.1) Scope of the procurement

II.1.1) Title

Planning and Building Control Software

Reference number

DN743364

II.1.2) Main CPV code

- 48000000 - Software package and information systems

II.1.3) Type of contract

Supplies

II.1.4) Short description

Plymouth, a dynamic city on England's south coast, is renowned for its rich maritime heritage and evolving urban landscape. As the city grows, Plymouth City Council (PCC) faces the challenge of maintaining efficient administrative and regulatory services. Currently, the council utilises a comprehensive software system to manage planning, building control and other regulatory services. However, with the demands of a modernising city, PCC recognises the need for an updated system that can better support its operations and enhance service delivery to its customers and residents.

The requirements for a comprehensive system designed to manage pre-application planning, planning applications, planning appeals, planning enforcement, building control applications, building control enforcement and highways-related functionalities. The goal of this system is to streamline processes, enhance user experience, ensure data security, and provide robust reporting capabilities.

Delt Shared Services, a strategic partner of Plymouth City Council, plays a crucial role in managing and supporting the council's IT infrastructure. Recognising the limitations of the current software, Delt Shared Services has advised PCC on the necessity of transitioning to a new system that can more effectively handle the city's administrative needs. This collaborative approach ensures that the council's requirements are thoroughly understood and addressed, leading to a more streamlined and efficient process for all stakeholders

involved.

To achieve this transition, Plymouth City Council, with the support of Delt Shared Services, is initiating a tender process to identify the most suitable replacement for their current software. The objective is to procure a system based on the Most Economically Advantageous Tender (MEAT) criteria, ensuring that the selected solution provides the best value for money while meeting the council's operational needs. This process will involve a thorough evaluation of potential systems, considering factors such as functionality, scalability, and cost-effectiveness, to ensure that the new system will effectively support PCC's objectives and contribute to the city's continued growth and development.

II.1.5) Estimated total value

Value excluding VAT: £250,000

II.1.6) Information about lots

This contract is divided into lots: No

II.2) Description

II.2.2) Additional CPV code(s)

- 48000000 - Software package and information systems

II.2.3) Place of performance

NUTS codes

- UKK - South West (England)

II.2.4) Description of the procurement

We are seeking to appoint a provider for a comprehensive planning and building control management software, commencing in July 2025 for a 5-year period. A mobilisation phase will be required leading up to the go-live date to ensure full system readiness and seamless delivery.

Key Deliverables

Planning Management: The system must support efficient management of statutory planning processes, including pre-application inquiries, applications, appeals, and enforcement. It should automate online submissions, data entry, document validation, and payment

processing. Integration with third-party platforms such as the Planning Portal, Microsoft 365, and GIS is essential. Public access must enable users to search, track, and comment on applications, with live performance dashboards for monitoring.

Building Control: The system must facilitate end-to-end management of building control applications, compliance, enforcement, and dangerous structures. It should automate task generation, notifications, fee tracking, and inspection record management. Integration with the Building Safety Regulator is required, along with secure document handling and data exports.

Highway Management: The software must manage Highway Legal Agreements, including Section 278 and 38 Agreements. It should automate bond calculations, track the legal process, and integrate with planning and GIS systems.

System Constraints

The system must be user-friendly, require minimal training for basic tasks, and avoid single points of failure. End-to-end functionality must be achieved without relying on multiple systems.

II.2.5) Award criteria

Price is not the only award criterion and all criteria are stated only in the procurement documents

II.2.6) Estimated value

Value excluding VAT: £250,000

II.2.7) Duration of the contract, framework agreement or dynamic purchasing system

Duration in months

60

This contract is subject to renewal

Yes

Description of renewals

Two one year extensions.

II.2.10) Information about variants

Variants will be accepted: No

II.2.11) Information about options

Options: No

II.2.13) Information about European Union Funds

The procurement is related to a project and/or programme financed by European Union funds: No

Section IV. Procedure

IV.1) Description

IV.1.1) Type of procedure

Open procedure

IV.1.8) Information about the Government Procurement Agreement (GPA)

The procurement is covered by the Government Procurement Agreement: No

IV.2) Administrative information

IV.2.2) Time limit for receipt of tenders or requests to participate

Date

1 November 2024

Local time

12:00pm

IV.2.4) Languages in which tenders or requests to participate may be submitted

English

IV.2.6) Minimum time frame during which the tenderer must maintain the tender

Duration in months: 3 (from the date stated for receipt of tender)

IV.2.7) Conditions for opening of tenders

Date

1 November 2024

Local time

12:30pm

Section VI. Complementary information

VI.1) Information about recurrence

This is a recurrent procurement: No

VI.2) Information about electronic workflows

Electronic ordering will be used

Electronic invoicing will be accepted

Electronic payment will be used

VI.4) Procedures for review

VI.4.1) Review body
