Reference

T25-006ENV

Description

Through the preparation of the recently launched Newtownstewart Town Centre Regeneration Framework, council officers have been engaging with local stakeholders across a range of key themes and issues. A key consideration for local stakeholders relates to current and future on-street/off-street car parking provision that supports the growth of Newtownstewart as a thriving and vibrant town centre that serves the needs of the location population. Therefore, a key action within the Regeneration Framework is the commissioning of a focused study to examine current and future car parking provision in the town centre. Derry City and Strabane District Council therefore seek to procure a consultant to undertake research and development of the Newtownstewart Town Centre Car Parking Capacity study. The objective for this study is to analyse and understand the carparking demands within the main street and surrounding commercial streets leading towards main street Newtownstewart. Your submission must be submitted via etendersNI, via this CFT. No other method of submissions will be accepted. Please refer to the CfT

documents for further detail.
