II.2.4) Description of the procurement

There are currently six closed landfill sites for which the authority is responsible. The sites are all unlined, un-engineered, working on the 'dilute and disperse' principle.

The key liabilities associated with these sites are the environmental discharges of leachate to water courses and methane to air. There is also some responsibility to ensure the facilities are safe and appropriately secure, under the Corporate Manslaughter Act 2007.

Each site has a specific maintenance schedule to maintain access for the purposes of environmental monitoring and to keep the sites in a secure and orderly manner. A healthy cover of vegetation across the waste area is important to reduce surface water ingress, which in turn can impact the function of the landfill, by increasing leachate and gas production.

The Council owns three sites; Baystone Farm, Faygate and Westhampnett, with the remaining sites owned by private landowners. Despite not being landowner, the Council retains the environmental liability for these sites, but does not have control over the use of the land, e.g. for grazing

II.2.5) Award criteria
