## **Defence Equipment Engineering and Asset Management System (DEEAMS)**

Ministry of Defence

F16: Prior information notice for contracts in the field of defence and security

Notice identifier: 2022/S 000-030155

Procurement identifier (OCID): ocds-h6vhtk-037c3e

Published 26 October 2022, 11:20am

### **Section I: Contracting authority/entity**

#### **I.1) Name, addresses and contact point(s)**

Ministry of Defence

MOD Abbey Wood, Elm 3b, #4342

Bristol

BS34 8JH

#### **Contact**

James Clarke

#### **For the attention of**

clarke james

#### **Email(s)**

[DESDIGITAL-DEEAMSMailbox@mod.gov.uk](mailto:DESDIGITAL-DEEAMSMailbox@mod.gov.uk)

#### **Country**

United Kingdom

**Internet address(es)**

**General address of the contracting authority/entity**

<https://www.gov.uk/government/organisations/defence-equipment-and-support>

**Further information**

Further information can be obtained from the above mentioned contact point(s)

#### **I.4) Contract award on behalf of other contracting authorities/entities**

The contracting authority/entity is purchasing on behalf of other contracting authorities/entities:

No

---

## **Section II: Object**

### **II.1) Title attributed to the contract by the contracting authority/entity:**

Defence Equipment Engineering and Asset Management System (DEEAMS)

### **II.2) Type of contract and location of works, place of delivery or of performance**

Services

Service category No 3: Defence services, military defence services and civil defence services

### **Main site or location of works, place of delivery or of performance**

United Kingdom

### **NUTS code**

- UK - United Kingdom

### **II.3) Information on framework agreement**

The notice involves the establishment of a framework agreement: No

### **II.4) Short description of nature and scope of works or nature and quantity or value of supplies or services**

The DES Digital delivery team within Defence Equipment and Support (DE&S) is preparing to initiate a competitive procurement process to award a contract for a new Defence Equipment Engineering and Asset Management System (DEEAMS). As part of this process, an Industry Day will be held Wednesday November 23rd. For full information, see Additional Information Field.

DEEAMSs will provide a pan-Defence Engineering Through Life Support (ETLS) capability. It will rationalise the existing fragmented IT application landscape not only replacing the 3-core domain Equipment & Asset & Management Systems (JAMES, UMMS, Goldesp) but also a substantial number (20+) of bespoke applications and paper-based systems. DEEAMS will address a significant scope of activity within Defence Support specifically Engineering and Equipment Support, which includes Maintenance & Repair, Engineering Planning, Obsolescence, Technical Information, Safety Management, enhancing and expanding the capabilities of the current Equipment & Asset Management

(E&AM) applications. These activities are serviced by more than 100,000 users across the Defence Support Network comprising MoD, Civil Servants, and Industry partners.

The DEEAMS procurement seeks a Systems Integrator (SI) to deliver an ETLs capability configured from Commercial Off The Shelf (COTS) software. The SI will manage the introduction of the solution into service including data migration from legacy systems, integration with other MOD systems, DEEAMS system acceptance and assurance. The SI will also deliver a core basic training package for further development by a third party.

Support is required during the incremental deployment of the solution over three releases (excluding help desk support, which will be provided by Defence Digital) and for one year following delivery of the final release, including the handover of appropriate data and knowledge transfer to facilitate downstream support by a third party. It should be noted that this contract will cover the initial licencing of the software for the duration of the SI contract. The role of the SI will effectively cease at this point, and the Authority will provide training and subsequent In-Service support (including licencing & change management) for the system via alternative arrangements. The contract excludes any user devices, which are to be covered under separate arrangements.

### **Estimated value excluding VAT**

Range: between £100,000,000 and £150,000,000

### **Lots**

This contract is divided into lots: No

## **II.5) Common procurement vocabulary (CPV)**

- 72320000 - Database services

### **Additional CPV code(s)**

- 48430000 - Inventory management software package
- 48451000 - Enterprise resource planning software package
- 48610000 - Database systems
- 48612000 - Database-management system

---

## **Section VI: Complementary information**

### **VI.1) Information about European Union funds**

The contract is related to a project and/or programme financed by European Union funds:  
No

### **VI.2) Additional information**

#### **1. Description**

The DES Digital delivery team within Defence Equipment and Support (DE&S) is preparing to initiate a competitive procurement process to award a contract for a new Defence Equipment Engineering and Asset Management System (DEEAMS).

DEEAMSs will provide a pan-Defence Engineering Through Life Support (ETLS) capability. It will rationalise the existing fragmented IT application landscape not only replacing the 3-core domain Equipment & Asset & Management Systems (JAMES, UMMS, Goldesp) but also a substantial number (20+) of bespoke applications and paper-based systems. DEEAMS will address a significant scope of activity within Defence Support specifically Engineering and Equipment Support, which includes Maintenance & Repair, Engineering Planning, Obsolescence, Technical Information, Safety Management, enhancing and expanding the capabilities of the current Equipment & Asset Management (E&AM) applications. These activities are serviced by more than 100,000 users across the Defence Support Network comprising MoD, Civil Servants, and Industry partners.

The DEEAMS procurement seeks a Systems Integrator (SI) to deliver an ETLS capability configured from Commercial Off The Shelf (COTS) software. The SI will manage the introduction of the solution into service including data migration from legacy systems, integration with other MOD systems, DEEAMS system acceptance and assurance. The SI will also deliver a core basic training package for further development by a third party.

Support is required during the incremental deployment of the solution over three releases (excluding help desk support, which will be provided by Defence Digital) and for one year following delivery of the final release, including the handover of appropriate data and knowledge transfer to facilitate downstream support by a third party. It should be noted that this contract will cover the initial licencing of the software for the duration of the SI contract. The role of the SI will effectively cease at this point, and the Authority will provide training and subsequent In-Service support (including licencing & change management) for the system via alternative arrangements. The contract excludes any user devices, which are to be covered under separate arrangements.

Procurement Timescales & Contract Value.

The Authority anticipates issue of Contract Notice and to start Supplier Selection in January 2023 with the issue of an Invitation To Negotiate in April 2023. The current estimated value range of the Contract is £100-150m

## 2. Industry Day.

Prior to initiating the procurement, it is confirmed that the Authority intends to hold an Industry Day on Wednesday, 23 November 2022. The event location is The Concorde Room, BAWA Healthcare & Leisure, 589 Southmead Road, Filton, Bristol, BS34 7RG. Attendance is by application only and the details of that process are in the following paragraphs.

The purpose of the industry day is principally to brief the DEEAMS requirement, without commitment at this stage, and to:

- Update suppliers on the developments the BMfS programme (change to strategy and approach).
- Ensure that the DEEAMS requirement is understood
- Articulate the DEEAM project timelines
- Explain our approach to Tender evaluation
- Solicit feedback from suppliers on of various areas of the project

The MOD is not expecting suppliers to present any information about their potential solutions at the Industry Day.

The day will provide important information about DEEAMS and its global operational context, provide some high-level information on the key engineering and asset management processes, the principal system design requirements, and the commercial roadmap.

Copies of the slides will be published after the event on [www.contracts.mod.uk](http://www.contracts.mod.uk) under the DEEAMS Opportunities Notice for those suppliers that are unable to attend the Industry Day.

To apply for the Industry Day, could you please provide us with your responses by the close of Wednesday 16 November 2022. These should be provided by e-mail to James at [DESDIGITAL-DEEAMSMailbox@mod.gov.uk](mailto:DESDIGITAL-DEEAMSMailbox@mod.gov.uk)

Please provide the following details:

- o Company name
- o First Name, Initial(s), Family Name of attendees
- o Prime point of contact name and email address

You may nominate up to two attendees. Based on the level of interest, space may be limited to 1 person; if so, your first nominated person will be the one selected to attend. Last date for nominations will be Wednesday 16 November 2022.

Please note that non-participation in either the Industry Day shall not prevent any supplier from subsequently expressing an interest in responding to the Contract Notice and PQQ.

A full list of industry attendees and their e-mails will be provided to you in the registration pack.

### 3. Further Information.

Any questions related to the DEEAMS project should also be directed to Nick at [DESDIGITAL-DEEAMSMailbox@mod.gov.uk](mailto:DESDIGITAL-DEEAMSMailbox@mod.gov.uk)

You must not take this announcement to mean confirmation that MOD shall award a contract for this requirement. The MOD is publishing this announcement without any commitment to issue a tender or place a contract. Accordingly, any expenditure, work or effort undertaken before contract award is a matter solely for the commercial judgement of potential suppliers.
