## **Section II: Object**

### **II.1) Scope of the procurement**

#### **II.1.1) Title**

How can technology help to quickly identify people in the most vulnerable situation and prioritise the support for them?

#### **II.1.2) Main CPV code**

- 72000000 - IT services: consulting, software development, Internet and support

#### **II.1.3) Type of contract**

Services

#### **II.1.4) Short description**

Not all energy consumers are equal. Some are more vulnerable than others and need extra and immediate help. In an audience where everyone is vulnerable, prioritisation is more difficult and that can have a huge impact for the consumer, potentially increasing the risk of harm or even be life threatening. These outcomes impact friends, families and our staff working with the consumer.

Consumers don't always clearly and succinctly outline their concerns or feelings, which can make detection and identification of priority cases difficult under a load of information, some of it more relevant than others and the sheer volume can hide those in need of greatest help.

Please visit our website for information on CivTech and how to get involved:

<https://www.civtech.scot/how-to-apply-civtech-8>

#### **II.1.5) Estimated total value**

Value excluding VAT: £650,000

#### **II.1.6) Information about lots**

This contract is divided into lots: No

## **II.2) Description**

### **II.2.2) Additional CPV code(s)**

- 85300000 - Social work and related services
- 71314200 - Energy-management services

### **II.2.3) Place of performance**

NUTS codes

- UKM - Scotland

### **II.2.4) Description of the procurement**

CivTech's mission is to drive daring and innovation in the public sector by collaboratively solving Challenges that make people's lives better – and in doing so create generations of sustainable, high growth businesses.

CivTech brings together public sector expertise and private sector innovation to solve real problems, develop new products, and deliver better, faster and easier services for everyone. Central to the approach is co-production with the citizen.

Part of the Scottish Government's Digital Directorate, CivTech's approach is helping transform public sector engagement with tech and innovation, delivering significant benefits to public services, producing genuine uplifts for the Scottish economy - and along the way, making lives better.

Across the country there are problems public sector organisations would like to solve and in the current environment the need for smart, efficient and effective products has never been greater. The Scottish Government is aware innovation is a good way to create them and is committed to ensuring a large part of its tech spend goes to smaller, innovative businesses. This is where CivTech comes in.

The CivTech Innovation Flow is designed to create products as quickly and effectively as possible, and uses a true Accelerator model at the heart of its Innovation Flow model. For you – whether you're an individual, team or company – it's an opportunity to take on a Challenge, solve it, and win contracts with a blue-chip public or voluntary sector organisation. You'll build a product, and a business to take it as far as possible. Because here's the kicker: the Challenges we issue aren't 'single organisation' problems – most exist worldwide.

In short: Open Challenges are set. Any organisation, team or individual can respond. Applications are assessed, and shortlisted proposals go into an Exploration Stage where they're developed further [for which participating applicants are paid]. The best go

through to the Accelerator – a period of intensive work to create the solution, and through CivTech's unique business workshop system, a business capable of taking the product to the world.

Please visit our website for information on CivTech and how to get involved:
