Candidates shall be required to satisfy minimum standards and to provide proof of economic and financial standing.

(a) in response to Question Ref 4B.4 provide a value and self-assess the risk rating for each of the nine financial ratios. Candidates do not need to provide a value for Test 9 as the Authority will independently carry out a credit check for Test 9. Financial tests will be applied on the most recent audited accounts; and

(i) state this explicitly;

(ii) provide a letter of commitment from the parent company (or other organisation) to provide a guarantee; and

Part II: Information Concerning the Bidder and Part VI: Concluding statements

Candidates unable to complete this part of the SPD may be excluded from the Procurement.

The Authority has determined that the application of multiple lots will not be utilised for this Procurement. The decision not to utilise multiple lots is justified as follows;

- (i) a competitive market exists for the full scope of requirements;
- (ii) delivery of inter-linked service provision is best delivered through a single provider and is a fundamental characteristic of the Enterprise Project delivery model;
- (iii) the cost of procurement is likely to be higher if lotting is used;
- (iv) the cost of contract management is also likely to be higher; and

(v) lotting may lose potential economies of scale and therefore value of delivering across the geography of North Lanarkshire.

The estimated contract value is 450m GBP over the full contract term (including all extensions) based on the Authority's estimated future budgets for the Services. There is no guarantee of this level of business. The estimated contract value relates to any Services (Core Services and Core Programmes) which may be reasonably required to maintain the Affected Properties over the contract term as set out in the procurement documents, the provision of such services not to be constrained by the estimated contract value.

The procurement will be conducted in accordance with the Public Contracts Scotland Regulations 2015 as amended, and any successor legislation which may follow using the competitive procedure with negotiation as set out in Regulation 30 of the Public Contracts Scotland Regulations 2015. The use of the competitive procedure with negotiation is justified on the basis that the Contract cannot be awarded without prior negotiations. The nature and complexity of the Contract and the need to mitigate risk on technical, financial, legal and reputational dimensions necessitates negotiations.

The Authority is committed to ensuring delivery of high quality services and to achieving best value through the contract by:

- 1) securing continuous improvement in the performance and delivery of its function;
- 2) maintaining an appropriate balance between quality and whole life cost; and
- 3) actively contributing to sustainable development.

It is expected that the Contractor will take a positive approach to the inclusion of a number of fair work practices throughout the Contract Term.
