II.2.4) Description of the procurement

Westmorland and Furness Council's capital programme for highways and civil engineering works provides for all aspects of the maintenance, repair and development of its highway assets.

Typical work includes:

— structures and bridges – repair and or maintenance of highways structures including retaining walls and bridges. Typical schemes are around 50,000 GBP to 250,000 GBP and include culvert replacement, masonry arch bridge repairs, replacement of sections of retaining wall and sea wall repairs. Structures are primarily stone or stone faced, reinforced or mass concrete or structural steelwork and are most often on carriageway or local roads,

— public realm – improvements to town centre environments likely to involve highway surfacing, footpaths, drainage and improvements to signage. Works may also include improvements to the look and function of transport interchanges,

— highway improvement (including S278) — improvements to junctions, access roads, car parks and distributor routes to improve safety and or facilitate development,

— footpath/cycleway improvements – Schemes (circa 250,000 GBP - 2,000 000 GBP) may be let through this framework. Schemes are related to the Council's Local Cycling and Walking Improvement Plan (LCWIP) and are funded via the Active Travel grant funding.

— drainage, ground stabilisation and flood prevention schemes – schemes could include packages of several small drainage schemes or piling, slope stabilisation or slope protection schemes adjacent to highways. Schemes could also include a variety of flood prevention schemes.
