<https://procontract.due-north.com/Advert/Index?advertId=e30e033a-c55a-ed11-811b-9f38301b3091>

Additional information can be obtained from the above-mentioned address

Tenders or requests to participate must be submitted electronically via

<https://procontract.due-north.com/Advert/Index?advertId=e30e033a-c55a-ed11-811b-9f38301b3091>

I.4) Type of the contracting authority

Regional or local authority

I.5) Main activity

General public services

Section II: Object

II.1) Scope of the procurement

II.1.1) Title

Supply of Electrical Testing Services Y23003

Reference number

DN641073

II.1.2) Main CPV code

- 71314100 - Electrical services

II.1.3) Type of contract

Services

II.1.4) Short description

The Framework Agreement will be split into 3 LOTs:

LOT 1 – Portable Appliance Testing (PAT)

A portable appliance is an item of electrical equipment which is connected to the power supply with a flex and a plug. This includes computers and their components. Testing engineers will inspect, test and certify all portable appliances, as covered by the Institute of Electrical Engineers (IEE) Code of Practice, and provide advice as to their condition and safety. A written report and test certificate will be provided as evidence that the portable appliances have had a combined inspection and electrical safety test.

LOT 2 – Fixed Installation Testing (FIT)

A fixed electrical installation includes all parts of a distribution system from the main incoming supply point through to wiring accessories such as sockets and light fittings. Engineers are looking to identify any potentially dangerous defects within the system that may lead to fire or injury. The benchmark for this inspection and test process is BS 7671 (The IEE Wiring Regulations) which provides guidance on how systems must be designed, installed and maintained. After an initial visual inspection, several electronic tests are carried out by injecting test voltages and current through the system to determine the integrity and functionality of cables, accessories and disconnection devices. This form of test and inspection is paramount to safety in the workplace. A written Periodic Inspection Report will be provided as evidence that the fixed installations have had a

combined inspection and electrical safety test. In addition to details and characteristics of the installation that has been tested the report will also provide the client with a list of any defects or deviations from the British Standard that may have been identified during testing.

LOT 3 – Electrical Testing of Street Lighting and Street Furniture

Each street lighting asset, illuminated signs/bollards and similar street furniture that requires electrical testing will have the following tests carried out and the results recorded in electronic format;

- Visual inspection to establish the condition of all electrical components, fixings, wiring and terminations, and integrity of the column door and surround;
- Verification of correct rating of protective device, continuity of protective conductors and earth bonding;
- Insulation resistance between live/earth and neutral/earth with assembly wiring disconnected;
- Earth fault loop impedance at District Network Operator supply cut-out;
- Capacitance Test shall be carried out and the results of measured values recorded against stated values.

II.1.5) Estimated total value

Value excluding VAT: £10,000,000

II.1.6) Information about lots

This contract is divided into lots: Yes

Tenders may be submitted for all lots

II.2) Description

II.2.1) Title

Portable Appliance Testing (PAT)

Lot No

II.2.2) Additional CPV code(s)

- 71314100 - Electrical services

II.2.3) Place of performance

NUTS codes

- UK - United Kingdom

II.2.4) Description of the procurement

A portable appliance is an item of electrical equipment which is connected to the power supply with a flex and a plug. This includes computers and their components. Testing engineers will inspect, test and certify all your portable appliances, as covered by the Institute of Electrical Engineers (IEE) Code of Practice, and provide advice as to their condition and safety. A written report and test certificate will be provided as evidence that the portable appliances have had a combined inspection and electrical safety test.

II.2.5) Award criteria

Price is not the only award criterion and all criteria are stated only in the procurement documents

II.2.6) Estimated value

Value excluding VAT: £3,500,000

II.2.7) Duration of the contract, framework agreement or dynamic purchasing system

Duration in months

48

This contract is subject to renewal

No

II.2.10) Information about variants

Variants will be accepted: No

II.2.11) Information about options

Options: No

II.2.13) Information about European Union Funds

The procurement is related to a project and/or programme financed by European Union funds: No

II.2.14) Additional information

To gain access and complete the necessary documents please follow the instruction below

Visit - WWW.Kentbusinessportal.org.uk

Select - Opportunities

Select Organisation - Commercial Services

Select the opportunity appropriate to you from the list provided

Express interest - you may need to register first

Once successful expression is completed you can access and complete the requirements in two ways

1 - when you register you will receive a successful registration email, this also contains a link taking you direct to the opportunity

2 - when you log in to proactis go to my activities, select commercial services and you will be presented with the opportunity.

Following the instruction from herein

2

II.2.2) Additional CPV code(s)

- 71314100 - Electrical services

II.2.3) Place of performance

NUTS codes

- UK - United Kingdom

II.2.4) Description of the procurement

A fixed electrical installation includes all parts of a distribution system from the main incoming supply point through to wiring accessories such as sockets and light fittings, and everything in between. The process of FIT involves a similar process to that of PAT in that a thorough visual inspection is carried out along with electronic tests. Engineers need to look at identifying any potentially dangerous defects within the system that may lead to fire or injury. The benchmark for this inspection and test process is BS 7671 (The IEE Wiring Regulations) which provides guidance on how systems must be designed, installed and maintained. After an initial visual inspection, several electronic tests will need to be carried out by injecting test voltages and current through the system to determine the integrity and functionality of cables, accessories and disconnection devices. This form of test and inspection is paramount to safety in the workplace. A written Periodic Inspection Report will need to be provided as evidence that the fixed installations have had a combined inspection and electrical safety test. In addition to details and characteristics of the installation that has been tested the report will also need to provide the client with a list of any defects or deviations from the British Standard that may have been identified during testing.

II.2.5) Award criteria

Section IV. Procedure

IV.1) Description

IV.1.1) Type of procedure

Open procedure

IV.1.3) Information about a framework agreement or a dynamic purchasing system

The procurement involves the establishment of a framework agreement

Framework agreement with several operators

In the case of framework agreements, provide justification for any duration exceeding 4 years:

IV.1.8) Information about the Government Procurement Agreement (GPA)

The procurement is covered by the Government Procurement Agreement: Yes

IV.2) Administrative information

IV.2.2) Time limit for receipt of tenders or requests to participate

Date

19 December 2022

Local time

2:00pm

IV.2.4) Languages in which tenders or requests to participate may be submitted

English

IV.2.7) Conditions for opening of tenders

Date

19 December 2022

Local time

2:15pm

Section VI. Complementary information

VI.1) Information about recurrence

This is a recurrent procurement: No

VI.3) Additional information

All public bodies will have access to this Framework Agreement but may only do so with the agreement of the Contracting Authority. Those organisations who may wish to access this Framework Agreement will be members, local government authorities, the police service, the fire service, the NHS and NHS trusts, housing associations, third sector organisations, academic centres (including Academies), free schools, publicly funded organisations and publicly owned private companies, operating within the geographic boundaries of the United Kingdom, Channel Islands, Northern Ireland and Isle of Man.

Full details of the classification of potential Customer's geographical areas and organisation classifications are detailed as follows:

LOCAL AUTHORITY COUNCILS:

England:

County, Unitary, District, Borough, and Metropolitan Councils. (Parish and Community Councils are also permissible users). See link:
