II.2.4) Description of the procurement

Bloomberg Software Subscription from November 2021 - October 2023 for Faculty of Business and Law. Bloomberg software offers the combination of data availability across many 'typical' areas within the financial market and a broad range of 'atypical' business areas like central banking, sustainability, shipping, marketing, supply chain etc., this provides for a unique offering compared to other providers who will typically have only financial market data which will be limited in the experience of the University. The Bloomberg terminals also provide analytics functions that allows for bespoke real time analysis; some very good quality visualisation tools, in this University experience, that make them the best, (currently available) for teaching. Bloomberg API's are also very useful in ensuring integration across other platforms.

Given the popularity of the Bloomberg terminals within the Finance, Investment, Banking and broader business sectors, our terminals are strategic in supporting student employability within the faculty.

There are no alternatives to Bloomberg. This subscription is an essential part of FBL's provision which must be maintained by Coventry University. The trading floor room is well utilised and will continue to be used for strategy classes for academic year 2021-2023.
