II.1.4) Short description

Located on the Harwell Science and Innovation Campus in Oxfordshire, Diamond is a cutting edge facility for science, engineering and innovation. It is the largest science facility to be

built in the UK for 40 years and produces ultra-violet, infra-red and X-ray beams of exceptional brightness. Diamond allows researchers from academia and industry to investigate the structure and behaviour of the world around us at the atomic and molecular level. Areas of investigation include fields such as medicine, the environment, materials and engineering science, physics, chemistry and heritage science. The research undertaken at Diamond brings economic, health and quality of life benefits to the UK and further afield.

The scope of this contract is to carry out manufacture, assembly, quality control and delivery to Diamond of 108 DL magnet mechanical assemblies for the Diamond-II storage ring, in accordance with the specification.
