II.1.4) Short description

B2G MWX will supersede and unify B2G's MW20 (national) and MW21 (regional) minor works frameworks, both of which are due to expire during Q1 2024, and will incorporate features successfully introduced in later frameworks,

This framework will be for use by any UK contracting authority to procure one-off projects, programmes or term contracts related to the delivery of planned and/or responsive minor works in the construction, repair, maintenance and improvement of both housing and non-housing.

This framework will be suited to principal contractors with multi-discipline capability, who operate both nationally and/or regionally, given that it will operate as a single UK lot, within which contractors have the option to designate 'active regions' and specialist 'work types'.

Specialist contractors may also prefer to register for the B2G DPS, which operates in tandem with all B2G frameworks.

However, whether framework or DPS, we set the bar high, and only appoint suppliers who are competent and competitive.

And since the best suppliers usually have the busiest bid teams, our bid docs are always designed to minimise bid team workload, with quality control focused on 'evidence not essays' and a simplified pricing format in sync with the UK gov's Should Cost Model,

which delivers competitive pricing whilst avoiding a race to the bottom.
