ENVWLB00485R

Description

This is a compact but intensive course targeted at Environment Agency Geoscience staff who need to understand groundwater chemistry within a short time as part of a Continuous Professional Development programme.

The main objectives are as follows:

- To produce engaging and graphical training material that gives a fundamental understanding of groundwater chemistry in different geological environments and methods for investigating them.
- To produce and deliver a training course in a blended learning format.

- To provide engaging post-course material that staff can use for self or group study. This could be in the form of workbooks/guided slide packs across real or hypothetical situations. The material will highlight how an understanding of groundwater chemistry is critical to the evaluation of complex groundwater problems.
- To train staff in understanding groundwater chemistry to aid their development and competence in risk-assessing regulatory activities and potential incident response.
- To introduce staff to current state of knowledge and methods for investigating emerging chemicals and plastics, including associated risks to the environment.

Total value (estimated)

- £0 excluding VAT
- £0 including VAT

Below the relevant threshold

Contract dates (estimated)

- 22 July 2025 to 31 March 2030
- 4 years, 8 months, 10 days

Main procurement category

Services

CPV classifications

- 80531200 - Technical training services

Contract locations

- UK - United Kingdom
