As part of its capital works programme the Council carries out inspections and reactive maintenance and repairs to its structures where defects occur or are identified that if left unattended could result in structural collapse and risk to the public.

Following a programme of Level 2 Scour Assessments across the County on the higher priority routes, a number of bridges have been identified with a Scour Risk Rating of either 1

or 2 (highest or second highest theoretical risk rating). These require regular inspections

for

scour damage either until foundation depths and founding material have been proven or until

scour protection measures have been provided.

In addition, some other bridges have been included at the specific request of the Bridge

Inspection Team and these require inspections at periodic intervals generally less frequent

than annual inspections.
