Reference number

c227271

II.1.2) Main CPV code

- 64121000 - Multi-modal courier services

II.1.3) Type of contract

Services

II.1.4) Short description

The Medicines and Healthcare products Regulatory Agency (MHRA) is an executive agency (Agency) of the Department of Health and Social Care in the United Kingdom. It ensures that medicines and medical devices work and are acceptably safe.

MHRA responsibilities include:

- Ensuring that medicines, medical devices and blood components meet applicable standards of safety, quality and efficacy.
- Ensuring that the supply chain for medicines, medical devices and blood components is safe and secure.

- Promoting international standardisation and harmonisation to assure the effectiveness and safety of biological medicines.
- Helping to educate the public and healthcare professionals about the risks and benefits of medicines, medical devices and blood components, leading to safer and more effective use.
- Supporting innovation and research and development that's beneficial to public health.
- Working collaboratively with partners in the UK and internationally to support our mission to enable the earliest access to safe medicines and medical devices and to protect public health.

MHRA's mission is to assure the quality of biological medicines and medical devices.

At the heart of this ground breaking research, is the preparation, storage and worldwide distribution of World Health Organization international standards and reference materials as benchmarks for product quality, which are used by industry, regulatory authorities and researchers world-wide. MHRA also produces reagents essential for the production of influenza vaccines each year and quality control reagents for the National Blood Service to help assure the safety of the UK blood supply.

We currently distribute materials to in excess of 95 countries around the globe. These materials are transported under three temperature zones, Ambient, chilled 2°C - 8°C (ice packs), frozen -20°C (Dry ice). These consignments have a validated cold chain life of between 96 and 120 hours. Due to the distances involved and the vagaries of local customs practices, firm management and control of the consignments is imperative. During the preceding four years we have

seen our volumes grow year on year by the order of 12.5%. It is envisaged that the total expenditure for 2025/26 will be in the approximately £1,200,000 for all movement types. It would be the intention of the Agency to achieve some significant savings through this process whilst retaining high success rates in its delivery objectives.

You as our courier, shall be crucial in ensuring this.

II.1.5) Estimated total value

Value excluding VAT: £6,000,000

II.1.6) Information about lots

This contract is divided into lots: Yes

Tenders may be submitted for all lots

Maximum number of lots that may be awarded to one tenderer: 2

II.2) Description

II.2.1) Title

2 Technical envelope

Lot No

Lot 1,2,3 & 4

II.2.2) Additional CPV code(s)

- 64121000 - Multi-modal courier services

II.2.3) Place of performance
