II.2.4) Description of the procurement

DMSL is managing a tender on behalf of the mobile network operators (EE, Telefonica, Three and Vodafone, collectively the "Contracting Organisations") to appoint suppliers who are able to provide a managed service to deliver mobile telecoms base station site services along with the operation and maintenance of selected equipment. Each of the Contracting Organisations will be a signatory to the Managed Solution framework.

These sites are part of the Shared Rural Network (SRN) which consists of circa 300 new telecoms mast base station sites in rural and remote locations across the UK. The sites are planned to be delivered either through this Managed Solution framework or through a separate framework for acquisition, design and build services (the procurement for which is being run in parallel), or a combination of both frameworks.

These sites will enable the Contracting Organisations, as part of the SRN programme, to fulfil their Ofcom Spectrum licence obligations by giving greater mobile network coverage in the UK.

Under the Managed Solution framework, the Contracting Organisations intend to procure a number of services and activities that allow for provision of new telecommunications

infrastructure that can provide mobile telephony services in remote and rural areas.

The scope of this requirement is a managed service that includes acquisition, design, build and operations and maintenance of the passive infrastructure in locations nominated by the Contracting Organisations. Supplier ownership of passive infrastructure, for example towers, compounds, fencing and power systems is included.

For clarity, supply of the radio access equipment and cabinets will be outside the scope of this procurement and will be supplied by or through the Contracting Organisations.
