## **Section II: Object**

### **II.1) Scope of the procurement**

#### **II.1.1) Title**

RACE - LongOps Next Generation Digital Mock Up

Reference number

T/PJP163/21

#### **II.1.2) Main CPV code**

- 72230000 - Custom software development services

#### **II.1.3) Type of contract**

Services

#### **II.1.4) Short description**

With rapidly advancing capability emerging from the field of robotic technology and systems engineering, UKAEA are seeking services to deliver innovation around a Next Generation Digital Mock-Up (NG-DMU). This would result in a platform that is essentially an aggregation of selected black-box software components that can be replaced or extended with minimal development effort, ultimately aiding the adoption of DMU tools by end-users.

The high-level outcomes of this task are:

- design techniques for architecting a DMU system that enabled rapid integration of new innovations,
- a proof-of-principle demonstration of these techniques by integrating software tools into a cohesive DMU,
- a core platform for demonstrating relevant innovations from throughout the LongOps programme, regarding LongOps end-user scenarios.
