The specialty of Oral Surgery (OS) deals with the diagnosis and management of pathology of the mouth and jaws that requires surgical intervention. Oral Surgery involves the treatment of children, adolescents and adults, and the management of dentally anxious and/or medically complex patients. The service is known/commissioned as Intermediate Minor Oral Surgery (IMOS) including treatment under Conscious Sedation and is aimed at those patients who require Level 2 care – that is ‘procedural and/or patient complexity requiring a clinician with enhanced skills and experience who may or may not be on the specialist register.’
