Description

The University of Chichester is looking to appoint a competent contractor to design, install and commission solar PV on three of its Halls of Residences at its Bishop Otter Campus in Chichester.

The three halls are all planned to be re-roofed, starting in September 2025. This work is urgent due to ongoing roof leaks. Whilst being pursued as quickly as possible, the necessary change in roofing material requires formal planning consent. The change in material is needed because the pitch of the roof is too shallow for the synthetic slates currently fitted. The new roof is planned to be Kingspan KS1000RW profiled insulated composite panels. These comprise a XL Forte plastisol steel outer sheet, a 40mm thick

rigid quadcore insulation core and a bright white plastisol finish lining panel face. The University is currently progressing the planning application with the support of a planning consultant and a roofing contractor already "on board".

As part of the project the University also wishes to install solar PV to reduce its carbon footprint and help reduce energy costs. Preliminary assessments in relation to solar PV have determined that solar PV is viable. A case has also been made for completing the re-roof and solar PV installations together, due to the saving on scaffolding costs. The planning application for the replacement of the roof therefore includes for solar PV too. Discussion in relation to procurement has however concluded that the design, installation and commissioning of the solar PV should be a separate procurement to the roof - although the University is seeking to see this co-ordinated with the new roof installation as efficiently as possible.

As a consequence, this contract will be a design and build contract for the design, installation and commissioning of solar PV on the roofs of Amberley, Chilgrove and Harting student residences. The form of contract will be a largely unamended JCT Design and Build Contract 2024 (DB 2024). This will be kept separate from the roofing contract, but sectional completion clauses will be used to correspond with the planned phasing of the roof replacement works.

Full details of our requirements are available in the tender documents.

All tender documents, Questions and Answers are open to all bidders. Please send your completed submission to the University by the closing date of 29 July 2025 at 09:00am, to tenders@chi.ac.uk.

Please note, we do not accept submissions via file transfer sites. tenders@chi.ac.uk accepts emails and attachments of up to 35MB and it is acceptable to submit in more than one email.

Total value (estimated)

- £100,000 including VAT

Below the relevant threshold

Contract dates (estimated)

- 1 September 2025 to 1 November 2025
- 2 months, 1 day

Main procurement category

Services

CPV classifications

- 09331200 - Solar photovoltaic modules
- 45261215 - Solar panel roof-covering work
- 51110000 - Installation services of electrical equipment

Contract locations

- UKJ27 - West Sussex (South West)

Participation

This procurement is reserved for

UK suppliers

Particular suitability

- Small and medium-sized enterprises (SME)
- Voluntary, community and social enterprises (VCSE)

Submission

Enquiry deadline

18 July 2025, 11:59pm

Tender submission deadline

29 July 2025, 9:00am

Submission address and any special instructions

The tender document and any supporting documents should be submitted to tenders@chi.ac.uk.

Full details are available at <https://help.chi.ac.uk/tenders>

Tenders may be submitted electronically

Yes

Award criteria

Name	Description	Type	Weighting
Coherence and clarity in meeting the University's requirements (including organisational experience and capability)	Made up of: Team Offer/ Capabilities - 5% Case Studies/ Previous Project Experience - 10% Approach & Delivery - 20% Presentation - 15%	Quality	50%
Commercial Offer	Made up of: Team Offer/ Capabilities - 5% Case Studies/ Previous Project Experience - 10% Approach & Delivery - 20% Presentation - 15%	Price	40%
Environmental and Sustainability performance	Made up of: Team Offer/ Capabilities - 5% Case Studies/ Previous Project Experience - 10% Approach & Delivery - 20% Presentation - 15%	Quality	5%
