Section II: Object

II.1) Scope of the procurement

II.1.1) Title

Provision of Ground Investigation Survey for Little Hulton Solar Farm

Reference number

DN639187

II.1.2) Main CPV code

• 45000000 - Construction work

II.1.3) Type of contract

Works

II.1.4) Short description

The survey will inform the project to construct a 3MW solar farm in Little Hulton. The project is part of the Unlocking Clean Energy Greater Manchester (UCEGM) Programme and is

receiving funding from the England European Regional Development Fund (ERDF) as part of the European Structural and Investment Funds Growth Programme 2014-2020. The Department for Levelling Up, Housing and Communities is the Managing Authority for European Regional Development Fund. Established by the European Union, the European Regional Development Fund helps local areas stimulate their economic development by investing in projects which will support innovation, businesses, create jobs and local community regenerations. For more information visit https://www.gov.uk/european-growth-funding.

The contractor is to undertake a Phase II interpretative ground assessment for the site at Kenyon Way, Little Hulton, Salford. The Phase II report is to assess the ground based geotechnical and environmental risks, constraints and liabilities associated with the proposed development of the site which is to be redeveloped as a ground mounted solar photovoltaic (PV) facility. The Phase II report is required to support contaminated land planning conditions, allow the design of economic foundation solutions and determine whether the local ground is suitable for the installation of the ground mounted solar photovoltaic (PV) facility.

The site is approximately 3.4 ha in size. The proposed solar PV facility development will include equipment that will be generally low lying (approx. height 2.4m) and capable of screening from surrounding vantage points. There will be a galvanised security fence of approx. 2.4m height around the site and there will be a proposed substation situated to the north west of the site. HV cables and other associated equipment cables will run beneath the site. Refer to Phase 1 Geotechnical and Geo-Environmental Desk Study Report prepared by AECOM Limited for further information (report revision 0 dated 28 February 2020).
