II.2.4) Description of the procurement

NHS Hampshire and Isle of Wight Integrated Care Board (ICB) is seeking the views of suppliers of Digital Remote Monitoring Solutions. The ICB's vision is to deliver high-quality health care to medically unwell patients who can be managed safely in their own homes. To achieve this vision, the ICB are seeking a suitable wearable or sensor based digital solution which can be easily worn and used by the frail and elderly patient cohort, removing the need for the patient to use multiple medical devices to collect their own clinical observations.

The ICB have been piloting a number of digital remote monitoring solutions which have not yet met all of their needs. The ICB now wish to begin to test the market by conducting a Request for Information (RFI) exercise to seek a more suitable digital solution that can be easily used by the frail and elderly patient cohort.

The budget for this requirement has yet to be determined.

This is a process designed to help the Commissioner form a view of the best way to procure a solution and is not the beginning of a Tender exercise. A draft copy of the outline specification is included in the RFI document and can be accessed via our eTendering portal. Please complete your response and return via our eTendering Portal, reference: - F16000 - by 12:00 Midday on Friday 6th January 2022.
