Description of risks to contract performance

1. There may be a need to change, increase, decrease or add new geography locations as Abri continues to grow. We are unable to advise if any future growth will lead to a change in geography but require the ability to amend the current landscape and geography of our area of service need. For avoidance of doubt, this will not be geography outside of the UK but may extend beyond the UK Mainland. This includes an supply provision under the contract as well as any services. Abri will work with existing service providers to obtain best value for money in the addition / amendment of geography.

2. There may be a change to the treatment and management of waste types beyond the control of Abri such as legislation change. Due to the nature of the global sustainability mission of most governments and the political sensitivity around sustainability and "Net Zero" Abri needs to ensure that contracts resulting from this Invitation to Tender may be modified to ensure correct treatment of newly classified waste. Abri expects any contracted service provider to be able to assist and ensure compliance with any regulatory, legislative or best practice requirements

3. There may be a need to migrate contract service scope from one contract awarded under this Invitation to Tender into another for a short or long period in the event the Contracted service Provider can no longer provide the service. Abri expects all Contracted Service providers to ensure correct cover of service. However there may be events beyond the control of Abri which are Service Sector Specific. Due to the requirement to ensure service continues Abri may partially or fully migrate services for any length of period

4. The addition of up to four twelve month periods to ensure service continuity in the event of high business change or challenge. This includes: future unplanned merger(s), future unplanned rebranding(s), non-preventable organisational restructure(s), Legislative amendments affecting a suitable procedure to be undertaken, natural disaster effecting Abri, War time impacts effecting Abri, UK Wide Economical disaster
