Scope

Description

Modification and upgrade works to ensure suitable remote conditional monitoring via installation of a new control system to existing site.

This will ensure capability to monitor and detect faults such as:

- Charger failure
- Oil pressure alarm
- Battery failure
- Loss of comms to the generator
- UPS failure
- Generator failure to start

- Leak detected within container

Supply and installation of generator container bund and associated alarm panel.

Supply and fit new Auto Transfer Switch Controller to ensure flexible switching and control technology for changeover between primary and back-up power source in event of power failure.
