Section II: Object

II.1) Scope of the procurement

II.1.1) Title

Tunable Broadband QC Laser System

Reference number

2023UoS-0836

II.1.2) Main CPV code

• 38636100 - Lasers

II.1.3) Type of contract

Supplies

II.1.4) Short description

The Optoelectronics Research Centre (ORC) is looking to purchase a tunable mid-IR laser system that can be used in the frame of the MISSION EPSRC programme grant. The ORC already possesses a tunable laser systems that cover the 6-12 m spectral range, however it does not operate in CW regime, has low output optical power and it has no beam pointing control. The MISSION is a flagship project with the main objective to demonstrate medical and environmental sensors based on absorption spectroscopy using silicon photonics platforms. It is a multi-institutional, multi-disciplinary project which requires a widely tunable mid-IR source with large CW output power and excellent beam pointing control. Since we are developing various sensing platforms it is crucial we get such a source to be able to efficiently test our sensors. The system will be used for research and will be based in Building 53 (Mountbatten building at Highfield campus).

Section VI. Complementary information

VI.6) Original notice reference

Notice number: 2023/S 000-034019

Section VII. Changes

VII.1) Information to be changed or added

VII.1.2) Text to be corrected in the original notice
