Other information

Description of risks to contract performance

Delivery charges

Conflicts assessment prepared/revised

Yes

Procedure

Procedure type

Direct award

Direct award justification

Switching to direct award

The BD Bactec FX is a closed system, it works exclusively with the BD blood culture bottles and, as such, to facilitate this tendered solution, across all sites, it stands that these must be consistently used. There is not a viable or compatible alternative. The risks

to not changing the Biomeriux bottles to BD bottles means that the newly installed BDFX analysers will not work on the current bottles.
